To: Cahya Tri Purnami &lt;cahyatp68@gmail.com&gt;

Dear Dr. Cahya Tri Purnami

Terimakasih sudah mengirimkan bukti pembayaran publikasi artikel dan Statement letter, **berikut terlampir LoA publikasi artikel.**

Terimakasih sudah mempertimbangkan Jurnal Aisyah: Jurnal Ilmu Kesehatan sebagai media diseminasi hasil kegiatan riset bapak/ibu sekalian.

Salam Hormat,

Pada tanggal **Jum, 21 Jan 2022** pukul 13.59 Cahya Tri Purnami <cahyatp68@gmail.com> menulis:

Yth. Pengelola Jurnal Aisyah

Bersama ini **kami kirimkan APCs dan statement letter**Salam  
Cahaya Tri P

### Abstract

ANC data in the maternal card cohort register at the Puskesmas can be used to detect risk factors for pregnancy and labor that can prevent maternal death, but this data has never been analyzed. This study aims to analyze the determinants of labor in mothers who received ANC by a midwife according to the data in the maternal card cohort. This research is a descriptive-analytic study design using the observational method. Data sourced from the maternal card cohort register that meets the standards of accuracy and completeness of ANC results in records until labor in the 2019 time period. A total of 172 data were used as samples. Maternal characteristics, maternal mortality risk factors, levels of maternal risk factors based on the Poedji Rochjati score as independent variables, and the act of labor is the dependent variable. Univariate and bivariate analysis was carried out descriptively and analytically using the chi-
