## COPYRIGHT TRANSFER AGREEMENT

In order to expedite the publication process, the transfer of copyright from the contributor(s) should be clearly stated to enable American Scientific Publishers (ASP) to disseminate your work to the fullest extent. The following copyright transfer must be signed and returned to the American Scientific Publishers, 26650 The Old Road, Suite 208, Valencia, California 91381, USA, as soon as possible after the manuscript is accepted for publication. The copyright to the unpublished and original research article, including copyright to the cover illustration, abstract forming part thereof should be transferred. By signing this agreement, the contributors (authors) warrant that the entire work is original and unpublished; it is submitted only to this Journal and all text, data, figures/tables or other illustrations included in this work are completely original and unpublished, and these have not been previously published or submitted elsewhere in any form or media whatsoever. Each author(s) agree to transfer all copyrights of this work to the Journal.

**Manuscript Title:** *Issues on Detection of Pre-eclampsia in Antenatal Care Data of Village - Midwives: An observational study in Temanggung District, Central Java Province*

**Contributor(s):** *Cahya Tri Purnami, Praba Ginanjar, Fand Agusshybara, Sutopo Patria Jati*

is hereby transferred and assigned to American Scientific Publishers for the full term of exclusive copyright and any extensions or renewals of that terms thereof throughout the world, including but not limited to publish, disseminate, transmit, store, translate, distribute, sell, republish and use the Contribution and material contained therein in print and electronic form of the journal and in other derivative works, in all languages and any form of media of expression available now or in the future and to license or permit others to do so.

- (1) The contributor(s) explicitly reserve the following rights:
  - (a) All proprietary rights other than copyright, such as patent rights.
  - (b) Make photocopies of his/her own work for his/her own classroom teaching and research purposes, and use part of the article and abstract, without revision or modification in own personal compilations provided that (i) such print copies and works are not resold or disseminated by authors and any other recipient parties where recipients are informed that no further photocopying or dissemination of Article is allowed and (ii) reference to the original source of publication and the name of the American Scientific Publishers as copyright holder is clearly stated on any use made of the article. (iii) Contributors should not post the Article on open websites or disseminate through an internet to anyone whatsoever.
  - (c) The right to use, figures/tables or other illustrations of Article (no text) in subsequent publications of the authors owns works provided that written permission is obtained from Publisher and that a proper acknowledgment is made to the original source of publication and to the Publisher.
  - (d) Any other use or reproduction in a collective work requires a fee and permission from Publisher.
  - (e) The right to grant or refuse permission to third parties to republish part of the article or translations thereof. However, the publisher except at the direction of the contributor(s) will not refuse such permission.
  - (f) American Scientific Publishers reserves the right to use all figures on any of its publication covers from the submitted manuscript. Each author(s) also grants American Scientific Publishers the rights to use his or her name and all biographical data in the article for its or the journal's promotion.

(2) If the article has been prepared by an employee within the duration of his or her employment, the employer reserves the right to make copies of the Work in print format for its own internal use or for promotional purposes only provided that proper reference is made to the original source of publication and to the Publisher. If the manuscript has been prepared as a work made for hire, both employer and employee should sign the copyright transfer.

(3) If the article was prepared under the U.S. Government contract, the transfer of copyright is effective to the extent that such copyright is transferable.

Each contributor(s) warrants that his or her research institution has fully approved the protocol for all scientific studies involving animals or humans and that all experiments of any kind were conducted in compliance with ethical and humane principles of research after approval.

The contributor(s) warrant that the work contains no unlawful or libelous statements and opinions and liable materials of any kind whatsoever, does not infringe on any copyrights, intellectual property rights, personal rights or rights of any kind of others, nor contains any plagiarized, fraudulent, improperly attributed materials, instructions, procedures, information or ideas that might cause any harm, damage, injury, losses or costs of any kind to person or property. The contributor(s) also represent and warrant that they have full power and authority to enter into this Agreement. All contributors are fully responsible for the complete contents of the manuscript. Each contributor(s) agrees to defend, indemnify, and hold harmless American Scientific Publishers and the Editors for any breach of warranties under this agreement. The undersigned hereby transfer the exclusive copyright interests in the above cited manuscript to the American Scientific Publishers, with the consent of all contributors.

Whenever publisher is contacted by third parties for individual permissions to use in a collective work, reprint for library reserve or classroom or otherwise, the undersigned Contributor's or employer's permissions will also be required.

This agreement should be signed by the Contributor(s) or in the case of multiple contributors, by at least one of the contributors who agrees to inform other co-contributors the full terms of this agreement and have their full permission to sign on their behalf.

Dear **Cahya Tri Purnami, Praba Ginandjar, Farid Agushybana, Sutopo Patria Jati,**

Congratulation! After being reviewed, we are pleased to inform you that your paper entitled “**Issues on Detection of Preeclampsia from Antenatal Care Data: A Documentary Study in Temanggung District, Central Java Province**” has been accepted to be published at Advanced Science Letters as Conference Proceeding of International Conference on Public Health for Tropical and Coastal Development (ICOPH-TCD 2016).

Thank you very much for your participation.

Semarang, 30 December 2016

Warm regards,

Dr. Martha Irene Kartasurya

Chair of ICOPH-TCD 2016 Organizing Committee

Supplementary Data

Suggestions

*Background:* Preeclampsia in pregnancy contributes to maternal mortality in Central Java Province. Risk factors of preeclampsia could be early-detected by village-midwives through antenatal care (ANC) data reported in Maternal Cohort Register (MCR), which is a national standard form. Quality of data recording and reporting is crucial to ensure the accuracy in the detection of preeclampsia risk factors, and will eventually decrease maternal mortality. *Methods:* This research was an observational study. Data were collected from all documents of ANC during 2014, which were recorded in MCR by 278 village-midwives in 23 public health centers of Temanggung District. Data were analyzed descriptively. *Results:* There were more than 60 fields of data to be recorded in MCR. Our results showed that 66% of the fields were filled completely. However, the record was mostly not recorded in its proper field. We also found different way of writing a field, which may confound the interpretation of data. In preeclampsia detection, only less than 20% documents were complete and consistent. *Conclusion:* Not all of the data for preeclampsia detection was recorded accurately, thus complicate the detection of preeclampsia risk factors. Village midwives need guidelines for reporting and training on electronic recording to detect maternal risk factors accurately and timely.
