

[TASJ] Submission Acknowledgement

Dari: Prof. Dr. Ir. Komang G. Wiryawan (jurnal@apps.ipb.ac.id)

Kepada: sgh_undip@yahoo.co.id

Tanggal: Kamis, 29 April 2021 12.49 WIB

Dr. Sugiharto Sugiharto:

Thank you for submitting the manuscript, "Haematological indices and intestinal ecology of broilers administrated with a novel additive based on Averrhoa bilimbi fruit filtrate, wheat bran and Saccharomyces cerevisiae" to Tropical Animal Science Journal. With the online journal management system that we are using, you will be able to track its progress through the editorial process by logging in to the journal web site:

Manuscript URL: <https://journal.ipb.ac.id/index.php/tasj/authorDashboard/submission/35504>

Username: sugiharto

If you have any questions, please contact me. Thank you for considering this journal as a venue for your work.

Prof. Dr. Ir. Komang G. Wiryawan

[TASJ] Revision Required of Your Manuscript

Dari: Prof. Dr. Komang G Wiryawan (jurnal@apps.ipb.ac.id)

Kepada: sgh_undip@yahoo.co.id; anugrahrobby18@gmail.com; tyudiarti@yahoo.co.id; tayasan@gmail.com

Tanggal: Senin, 7 Juni 2021 10.28 WIB

Dear Sugiharto Sugiharto, Anugrah Pratama, Turrini Yudiarti, Tugay Ayaşan:

It is my pleasure to inform you that your submission to Tropical Animal Science Journal, "Haematological indices and intestinal ecology of broilers administrated with a novel additive based on Averrhoa bilimbi fruit filtrate, wheat bran and Saccharomyces cerevisiae" had been examined by peer reviewers. Please find the comments and suggestions:

Submission URL: <https://journal.ipb.ac.id/index.php/tasj/authorDashboard/submission/35504>

Username: {\$authorUsername}

If you decide to revise the manuscript, please give a response or rebuttal against each point which are suggested by peer reviewers. The revised document should include revision note file in table form and revised manuscript in MS Word file. Please return back the documents to the editor within 14 days via OJS, we would be glad if you submit your revised manuscript as soon as possible.

If you have any questions, please contact me.

PAPER EVALUATION

Paper Title: **Haematological indices and intestinal ecology of broilers administrated with a novel additive based on *Averrhoa bilimbi* fruit filtrate, wheat bran and *Saccharomyces cerevisiae***

Comments (please use additional paper if more space is needed)

No	Comments	Author's response
A	Editor	
1	The title does not reflect the contents of the paper, as we need to be more specific on the title. The information of feed additives must be very specific and must know their concentration for each of them. Intestinal ecology is too broad that only 2 types of microbes were identified only.	
2	The authors must link why <i>Averrhoa bilimbi</i> fruit filtrate, wheat bran, and <i>Saccharomyces cerevisiae</i> were combined and used in this experiment. How can these combinations help? Any preliminary study to show the evidence?	
3	References a) Please ensure that every reference cited in the text is also present in the reference list (and vice versa). b) Please ensure that the number of the last 10 year journal publications is more than 80%.	
B	Reviewer I (MB 1)	
1	The performance data of broiler chickens (Final Body Weight, Feed Consumption, Body Weight Gain, FCR, Mortality) studied must be presented in this article to describe the effects of this additive comprehensively	
2	What kind of experimental design used? Is it a completely randomized design (CRD) or others? Please state clearly in the methods.	
3	Please see other comments in the text	
C	Reviewer II (MB 2)	
1	The introduction needs to be clear about: There are several statements that cannot be justified

	without being supported by accurate references. The hypothesis is also not clearly implied.	
2	<p>Methods:</p> <ol style="list-style-type: none"> 1. It is necessary to clarify the method of blood testing, especially in testing heterophils and lymphocytes. The units are not the same; if converted into %, it is more than 100%. 2. Physiological data should be analyzed descriptively based on the reference, the normal range of species studied, in order to conclude validly. 	
3	<p>Results:</p> <p>In this <i>Results Chapter</i>, the analysis of laboratory data should be sufficient. A discussion of the meaning, mechanism and causes is discussed in the <i>Discussion Chapter</i>. In this chapter, the research results are simply presented in tables/figures. What needs to be conveyed is that the statistical analysis is significant or not. So there is no need for numbers in tables or in pictures to be rewritten in this chapter</p>	
4	<p>Discussion:</p> <p>In this <i>Discussion Chapter</i>, it is better to discuss each sub-chapter as presented in the <i>Results Chapter</i>. At the end of this chapter, it is advisable to present a general discussion relating to the parameters tested. This is important to direct conclusions in this study.</p>	
5	<p>Conclusions:</p> <p>This conclusion is to answer the research objectives. It should be conveyed briefly, firmly and clearly based on the data and results of the discussion.</p>	
6	Please see other comments in the text

Bogor, June 28, 2021

Dear Sugiharto Sugiharto, Anugrah Pratama, Turrini Yudiarti, Tugay Ayaşan:

I am pleased to inform you that your article submitted to Tropical Animal Science Journal, entitled "Haematological indices, intestinal bacteria and morphology of broilers supplemented with a combination of Averrhoa bilimbi fruit filtrate, wheat bran and Saccharomyces cerevisiae" has been accepted for publication in this journal. We will send you the COPYEDITING of your manuscript as we will ask you for some correction of the typesetting.

Please find the attached invoice of the publication charge of your manuscript.

Thank you for your article submission, and we are looking forward to receive your incoming articles.
