external reviewers along with the Editor in charge of the manuscript in order for it to be accepted for publication in the journal.

The name of the Editor recommending the manuscript for publication is published with the manuscript to indicate and acknowledge their invaluable contribution to the peer-review process and the indispensability of their contributions to the running of the journals.

The peer-review process is single blinded; that is, the reviewers know who the authors of the manuscript are, but the authors do not have access to the information of who the peer reviewers are. Every journal published by JPHTCR has an acknowledgment page for the researchers who have performed the peer-review process for one or more of the journal manuscripts in the past year. Without the significant contributions made by these researchers, the publication of the journal would not be possible.

## **Publication Frequency**

April and October, twice a year

## **Open Access Policy**

This journal provides immediate open access to its content on the principle that making research freely available to the public supports a greater global exchange of knowledge.

## **About this journal**

JPHTCR is an open access, peer-reviewed journal on public health for tropical and coastal region. Each submitted article will be anonymously reviewed by expert peers appointed by the editor. Articles published in this journal could be in form of original article.
