About the Academy of **Entrepreneurship Journal (AEJ)**

H Index: 12

Scopus | Cite Score | 2020-1.1 | CiteScoreTracker 2021-1.0 updated monthly

Academy of Entrepreneurship Journal (AEJ) is a peer reviewed open access journal affiliated to Allied Business Academy. Sponsored by the professional bodies like the Academy of Entrepreneurship, the journal adheres to a stringent double blind peer review policy.

With an acceptance rate of 30%, AEJ considers theoretical, conceptual and empirical studies in entrepreneurship and small business management for publication. The journal caters to the needs of wide range of readers like B-schools, small and medium business entities,

industries, policy makers, researchers, scholars, academicians and students. To this extent the journal encompasses a broad spectrum of topics in this field for publication, including but not limited to Strategy and entrepreneurship, nascent entrepreneurship, global entrepreneurship monitor, female entrepreneurship, business model evolution, Latent entrepreneurship, global entrepreneurship monitor, entrepreneurial spirit, small business owner-manager, small and medium enterprises, industrial policy and sectoral choice, entrepreneurial heuristics, entrepreneurial Spirit, Small business and economic growth, Nascent and start-up entrepreneurs, New venture creation process, organization, and behavior family business, Managerial characteristics and behavior of entrepreneurs, start-up entrepreneurs, customer relationship management, consumer behavior, E-Commerce and E-Business Models.

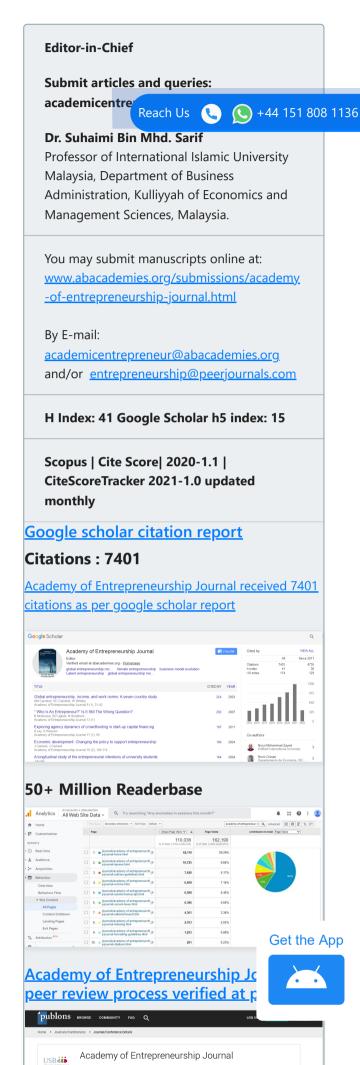

More information on the types of manuscripts published and the categories of research accepted are displayed in the Journal Matrix section of this website. Authors who would like to discuss the potential interest in a manuscript may contact the Editorial staff.

Fast Editorial Execution and Review Process (FEE-Review Process)

Academy of Entrepreneurship Journal (AEJ) is participating in the Fast Editorial Execution and Review Process (FEE-Review Process) with an additional prepayment of \$199 apart from the regular article processing fee. Fast Editorial Execution and Review Process is a special service for the article that enables it to get a faster response in the pre-review stage from the handling editor as well as a review from the reviewer. An author can get a faster response of pre-review maximum in 3 days since submission, and a review process by the reviewer maximum in 5 days, followed by revision/publication in 2 days. If the article gets notified for revision by the handling editor, then it will take another 5 days for external review by the previous reviewer or alternative reviewer.

Acceptance of manuscripts is driven entirely by handling editorial team considerations and independent peerreview, ensuring the highest standards are maintained no matter the route to regular peer-reviewed publication or a fast editorial review process. The handling editor and the article contributor are responsible for adhering to scientific standards. The article FEE-Review process of \$199 will not be refunded even if the article is rejected or withdrawn for publication.

The corresponding author or institution/organization is responsible for making the manuscript FEE-Review Process payment. The additional FEE-Review Process payment covers the fast review processing and quick editorial decisions, and regular article publication covers the preparation in various formats for online publication, securing full-text inclusion in a number of permanent archives like HTML, XML, and PDF, and feeding to different indexing agencies.

h-index

Articles published in Academy of Entrepreneurship Journal have been cited by esteemed scholars and scientists all around the world. Academy of Entrepreneurship Journal has got h-index 40, which means every article in Academy of Entrepreneurship Journal has got 40 average citations.

Academy of Entrepreneurship Journal (Print ISSN: 1087-9595; Online ISSN: 1528-2686)

Editorial Board

Academy of Entrepreneurship Journal (AEJ) is an open access publication affiliated to the Allied Business Academies. The Editorial Board of the AEJ exercises complete control over the editorial content of the Journal and it is currently published Bimonthl in a year. AEJ invites authors to submit manuscripts throughout the year to get accommodated in any of these editions. The Journal encourages participants in its associated conferences to submit their manuscripts for accelerated review.

AEJ encourages theoretical and empirical research in the field of, small and medium enterprises, industrial policy. All the manuscripts submitted for publication are subjected to a thorough double blind peer review process. The journal aims to expand the horizon of this scientific discipline through constant dissemination of innovations and knowledge sharing to further the reader's understanding of the Entrepreneurial Spirit and economic growth. Its current acceptance rate of manuscripts is 30%.

More details related to the types of manuscripts published and the categories of research accepted are displayed in detail in the Journal Matrix section of this website. Authors that intend to form part of the editorial board may contact the Editor by email. Individuals that are keen in joining the Editorial Board should contact the Editorial staff. The Journal is interested in expanding its Board and solicits inquiries.

IMPACT OF CORPORATE GOVERNANCE ON THE QUALITY AND CREDIBILITY OF ACCOUNTING INFORMATION IN THE FINANCIAL STATEMENTS IN THE COMMERCIAL BANKS OF JORDAN

Faris Irshaid Al Karabsheh, Al-Balqa Applied University

ABSTRACT

The spread of administrative and financial corruption, which is known to many companies and banks, as well as the financial crises that affected almost every aspect of the economy in various countries around the world and whose consequences continue to this day. have sparked a surge in interest in corporate governance. As well as significant skepticism regarding the purpose of many major worldwide corporations pursuing mergers and acquisitions. Accounting took into account all of the aforesaid factors. Corporate governance has been used in several studies and research. Some accounting and financial innovations and procedures to cover its shortfall or to reassure stakeholders of its stability and continuation are required. This group of corporations, in collusion with audit firms, withheld and falsified information about their operational financial and investment performance, resulting in harm to elderly investors, financial markets, and state economies as a result, this study attempts to elucidate the influence of corporate governance on the accuracy of accounting information in financial reports. In order for it to become a reality discuss corporate governance's goals and principles. Lastly, we will discuss how it improves the quality of accounting information. These findings suggest that corporate governance's fundamental goal should be to reestablish confidence in accounting information and control over it through accountability and control. Improve the quality of this information by establishing and enforcing accounting and auditing standards, as well as by enhancing the roles of the external and internal auditor and audit committees.

Keywords: Corporate Governance, Quality of Accounting Information, Credibility of Accounting Information Financial Reporting, Commercial Banks, Jordan.

INTRODUCTION

Due to the economic catastrophes and financial crises that happened in several Middle Eastern and North African nations in the 1990s, corporate governance has become more popular in many established and emerging economies (Reinhart & Rogoff, 2008). The recent financial and accounting failures of several US firms in 2009 are another example. One of the primary causes was the absence of complete disclosure of information needed by many consumers of financial reports in many firms' financial reports. Globalization and the internationalization of the money market have a particular impact on stock market investors (beljoudi & Samiha, 2017).

They've prompted a lot of nations to think about ways to safeguard investors from boardroom blunders, as well as pay greater attention to the role corporate governance plays in ensuring compliance with regulations and recruiting investments to boost economies (Roe,

BALANCED SCORECARD FOR PERFORMANCE EVALUATION OF INTELLECTUAL CAPITAL MANAGEMENT: A CASE STUDY

Donya Jasim Sahab, Al Qadisiyah University Ali Abbas Kareem, Al Qadisiyah University Sajjad Amer Dheyab, Al Rafidain University College

ABSTRACT

The research aims to measure the value of intellectual assets and disclose them in the company's balance sheet at a quantitative basis. The research was applied to Diyala State Company for Electrical Industries to ensure researchers have the existence of intellectual assets. However, it was not exploited in the correct way, and the research problem that lies in the company's failure to take the research sample to measure and disclose these assets in the general budget and the difficulty of integrating them into the accounting measurement process was addressed because traditional accounting systems focus on measuring physical assets only. These assets must also be disclosed in the balance sheet, which contributes to providing the necessary information for strategic performance after integrating intellectual assets in the measurement process with physical assets recognized in accordance with accounting concepts. This hypothesis has been proven and a set of conclusions have been reached, the most important of which are: the traditional general budget is far from showing the true value of the company, and it is only a picture of the previous activity, and it shows us only the historical operations of the company, while showing the value of intellectual assets in it will show the true value of the company And the mental abilities of the company's employees not only depend on academic qualifications but also on the skill and experience gained during his time in this field. The research also came out with a set of recommendations, including: The company's management must realize that its employees are not the same, but their values differ with the extent of their ability to create and define the company's future, and the distinguished must be rewarded so that they have the ability to creativity and innovation Intellectual Capital n to achieve a competitive advantage for them, and more attention must be paid to the assets Mankind with skills and experience and developing their expertise and competencies through holding training courses inside and outside the country.

Keywords: Balanced Scorecard, Intellectual Capital, Intellectual Capital Management, Performance of.

INTRODUCTION

With the beginning of the information technology revolution and the growing role of knowledge based on the experiences, skills and creative abilities of individuals to generate new knowledge, develop components of intellectual assets, and move from the stage of focusing on human assets to the stage of relying on a diverse network of knowledge assets, which represent a high percentage of the total value of companies. In addition to the diversity in the components of

CONCLUSIONS AND RECOMMENDATIONS

First: Conclusions

- 1. The general budget is far from showing the value of intellectual assets, and it is only a picture of the previous activity, and it shows us only the historical operations of the company.
- 2. The mental abilities of the company's employees depend not only on the academic qualifications, but also on the skill and experience that he gained from his work length in this field, as it is the highest percentage of people with more than 15 technical expertise who represent (52%).

Second: - Recommendations

- 1. Amendments must be made to the unified accounting system applied in Iraqi companies and include the paragraphs related to measuring and disclosing intellectual assets in a manner consistent with the paragraphs of the model and balanced performance card indicators.
- 2. It is important to apply the proposed model in the research to obtain the monetary value of these assets and disclose them.in the general budget because it is necessary to give a comprehensive view of the activities that take place within the company and to know the true value of them.
- 3. Paying attention to the development of the human assets in the company through activating the research and development departments and adopting the inventions and proposals submitted by the workers, especially in the field of producing new products or introducing improvements to the existing products and working hard. To invest them.
