Note from Editors

The 3rd International Conference on Tropical and Coastal Region Eco Development (ICTCRED) 2017 was held in Yogyakarta, Indonesia from 2nd to 4th October 2017. The conference was organized and fully supported by the Institute of Research and Community Services, Diponegoro University, Indonesia. Authors and participants from many countries made the conference truly international in scope. The scope of this conference varies from marine environment, marine products and their processing as well as oceanography technology, coastal environment management and policies. In addition, social science related to the coastal area development were also discussed.

This volume of *IOP Conference Series: Earth and Environmental Sciences* contains selected articles from those presented in the conference. After presentation, the revised papers were peer reviewed by fellow reviewers to ensure the quality of published materials. Finally, Editors decided to select and publish as many as 105 papers. It is hoped that the presented papers can offer more insight towards broad audience.

On behalf of Editors, we appreciate enormous work of all staffs and reviewers in the preparation of this volume. We would like to express our sincere thanks to all authors and presenters for their valuable contributions. We hope that the conference has been beneficial to all participants.
