Dear Prof/Dr Siti Aisah, Suhartini Ismail, Ani Margawati,

Greetings from the Malaysian Family Physician (MFP)!

Your manuscript entitled "THE EFFECT OF AN ANIMATED EDUCATIONAL VIDEO ON THE KNOWLEDGE OF ANEMIA PREVENTION AMONG FEMALE ADOLESCENTS BASED ON THE HEALTH BELIEF MODEL" (ID=136) has been reviewed again by the associate editor. Please find the comments below.

The manuscript requires MINOR REVISIONS before it can be reconsidered for publication in the MFP.

It is imperative for you to revise the manuscript according to all of the reviewers' & editors' comments. Kindly highlight in yellow all changes made in the manuscript (do not use track change mode). Please also prepare a cover letter with the point-by-point response to the reviewers' comments.

Once completed, please upload the files at the Review>Revision section in the portal under the MAIN MANUSCRIPT and COVER LETTER (With Response to Reviewers' Comments) components.

We look forward to receiving your revised manuscript within the next two weeks.

Thank you for submitting your article to the MFP!

Best regards,

Professor Dr Lee Ping Yein
Editor-in-chief
Malaysian Family Physician

In the Abstract (Results)

Although in the rebuttal letter, it mentioned that the correction has been made, it is not reflected in the main manuscript,

Discussion

Although in the rebuttal letter, it was mentioned that the limitations were inserted but I could not find it in the main manuscript.

Suggest to write as:

However, we acknowledged some limitations in this study. This study measured the posttest after 4 weeks intervention conducted. Therefore, we are not sure whether this increase in knowledge would be sustainable over time.

As this study only looked into the knowledge of the participants, the improved health outcome of reducing anaemia among females may not be achieved unless this knowledge is put into practice by the participants. Another study that look into the practice after a period of time would be able to assess the true impact of this intervention.

Please check thoroughly all revisions you have described in the rebuttal letter and ensure they are all reflected in the main manuscript.
