Keywords: Keywords: Teenage pregnancy, pregnancy care, tablets Fe.

Abstract

Abstract: Teenage pregnancy, pregnancy care, tablets Fe. Abstract: When pregnancy is more high in adolescence, teenage pregnancy has a higher risk for both mother and baby in the womb. Pregnancy care needs to be done routinely to prevent the effects of adolescent pregnancy. Pregnancy care aims to detect the risks of pregnancy early such as bleeding, LBW, preeclampsia and so forth. One of the most important in pregnancy is consuming Fe tablets. Fe tablets work to prevent anemia in the
