[IREMOS] Editor Decision

From: Editorial Staff (editorialstaff@praiseworthyprize.org)

To: ahmadfzakki@yahoo.com

Date: Friday, 17 December 2021 at 10:42 pm GMT+7

Dear dr. Ahmad Fauzan Zakki,

First of all, we apologize for the very lengthy review period.

Manuscript ID 20067 entitled "Hydrodynamic Characteristics of Fin Shaped Geometry for Sacrificial Anode Body to Reduce the Hull Appendages Effect" which you submitted to our Journal "International Review on Modelling and Simulations (IREMOS)" has been reviewed. The comments of the reviewer(s) are included at the bottom of this email.

The reviewer(s) have recommended a MAJOR REVISION.

This is an opportunity for you to respond to their major concerns and to incorporate improvements in the paper according to their suggestions. It is also an opportunity for you to add new results.

We normally only permit one major revision before an accept or reject decision is made. So please take the concerns of the reviewers seriously.

Therefore, I invite you to respond to the reviewer(s)' comments and revise your manuscript within two weeks from the date of this email.

If it is not possible for you to submit your revision in a reasonable amount of time, we may have to consider your paper as a new submission. You should revise your manuscript using a word processing program and save it on your computer. Please also highlight the changes to your manuscript within the document by using the colored text in red.

Once the revised manuscript is prepared, you can upload it and submit it through your on-line submission system.

In order to expedite the processing of the revised manuscript, please be as specific as possible in your response to the reviewer(s).

Once again, thank you for submitting your manuscript to our Journal and I look forward to receiving your revision.

Sincerely,

Dr. Santolo Meo, Editor-in-Chief of International Review on Modelling and Simulations (IREMOS)

santolo.meo@unina.it

Reviewer Responses:

After a complete review of the article, we strongly suggest the editor and author to undergo a major revision. A revised version after evaluation can be considered for publication.

Below the summary of the main remarks:

- No references are expected in the abstract.
- English grammar needs to be corrected. We suggest to use our service "English Language Editing". More information can be found to http://www.praiseworthyprize.com/english_service.htm

- Typos from the template are still present in the text.
- At the beginning of the paper, before the Introduction section, a Nomenclature section, not numbered, should be added with a list, in alphabetic order, of all the used distinct symbols/acronyms and their meaning.
- At the end of the Introduction add a paragraph on how the rest of the paper is organized and developed, typically a summary on the rest.
- Please note that color graphs could lose information in the paper printed in grey-scale, so the authors should use different markers for curves or labeled arrows or different background in order to preserve the significance of that colors.
- In the Conclusion paragraph the Authors could propose further improvements to be set for their proposal for a future development.
- The References list contains very few journals articles and not sufficiently recent. References list should be improved with more recent journals' papers (2019-to date) in the scientific area covered by the manuscript. We strictly encourage the authors to visit our wide database of titles where they could search for references, at the page <https://www.praiseworthyprize.org/jsm/index.php?journal=index&page=search>
- The review section should be expanded based on the proposed references list.
- The revised version of the paper should be sent in doc or docx version.

For any questions don't hesitate to contact us.
