Dear dr. Ahmad Fauzan Zakki,

First of all, we apologize for the very lengthy review period.

Manuscript ID 18228 entitled "Numerical Investigation of Hydrodynamic Behavior of Foil Shaped Zinc Anode for Reducing the Hull Appendages Effect" which you submitted to our Journal "International Review of Mechanical Engineering (IREME)" has been reviewed. The comments of the reviewer(s) are included at the bottom of this email.

The reviewer(s) have recommended a MAJOR REVISION.

This is an opportunity for you to respond to their major concerns and to incorporate improvements in the paper according to their suggestions. It is also an opportunity for you to add new results. We normally only permit one major revision before an accept or reject decision is made. So please take the concerns of the reviewers seriously.

Therefore, I invite you to respond to the reviewer(s)' comments and revise your manuscript within two weeks from the date of this email.

If it is not possible for you to submit your revision in a reasonable amount of time, we may have to consider your paper as a new submission. You should revise your manuscript using a word processing program and save it on your computer. Please also highlight the changes to your manuscript within the document by using the colored text in red.

Once the revised manuscript is prepared, you can upload it and submit it through your on-line submission system.

In order to expedite the processing of the revised manuscript, please be as specific as possible in your response to the reviewer(s).

Once again, thank you for submitting your manuscript to our Journal and I look forward to receiving your revision.

Sincerely,

Dr. Ethirajan Rathakrishnan, Editor-in-Chief of International Review of Mechanical Engineering (IREME)
erath@iitk.ac.in

Reviewer Responses:

After a complete review of the article, we strongly suggest the editor and author to undergo a major revision. A revised version after evaluation can be considered for publication.

Below the summary of the main remarks:

- Please increase the number of keywords in order to enhance the visibility and searchability of the manuscript in the website.
- At the end of the Introduction add a paragraph on how the rest of the paper is organized and developed, typically a summary on the rest.
- The References list contains very few journals articles and not sufficiently recent. References list should be improved with more recent journals' papers (2017-2020) in the scientific area covered by the manuscript. We strictly encourage the authors to visit our wide database of titles where they could search for references, at the page <http://www.praiseworthyprize.org/jsm/index.php?journal=index&page=search>
- Please try to argue the best behaviour of your technique respect to other already present in the literature.
- The text in some parts is unreadable due to the grammar and lack of ability to clearly explain the work. English grammar needs to be corrected. We suggest to use our service "English Language Editing". More information can be found to http://www.praiseworthyprize.com/english_service.htm
- The revised version of the paper should be sent in doc or docx version.

For any questions don't hesitate to contact us.

Reviewer Responses:

The following remarks should be still satisfied:

- 1- 50% of references should be of papers published by 2017-2020.
- 2- Please try to argue the best behaviour of your technique respect to other already present in the literature.
- 3- Some references are incomplete. Please add the missing information (Title of the Journal, volume, issue, page number, year of publication).

Moreover after all the above comments will be considered satisfied, in the acceptance e-mail it will be required to purchase the english editing service as for your request.

For any questions don't hesitate to contact us.
