GUIDANCE FOR AUTHORS

Aims and Scope *Biodiversitas*, *Journal of Biological Diversity* or *Biodiversitas* encourages submission of manuscripts dealing with all aspects of biodiversity including plants, animals and microbes at the level of the gene, species, and ecosystem. Ethnobiology papers are also considered.

Article types The journal seeks original full-length: (1) **Research papers**, (2) **Reviews**, and (3) **Short communications**. Original research manuscripts are limited to 8,000 words (including tables and picture), or proportional with articles in this publication number. Review articles are also limited to 8,000 words, while Short communications should be less than 2,000 words, except for pre-study.

Submission The journal only accepts online submission, through open journal system (<https://smujo.id/biodiv/about/submissions>) or email to the editors at unsjournals@gmail.com. Submitted manuscripts should be the original works of the author(s). Please ensure that the manuscript is submitted using the *Biodiversitas* template, which can be found at (<https://biodiversitas.mipa.uns.ac.id/D/guidance.htm>). The manuscript must be accompanied by a cover letter containing the article title, the first name and last name of all the authors, a paragraph describing the claimed novelty of the findings versus current knowledge. Please also provide a list of five potential reviewers in your cover letter. Submission of a manuscript implies that the submitted work has not been published before (except as part of a thesis or report, or abstract); and is not being considered for publication elsewhere. When a manuscript written by a group, all authors should read and approve the final version of the submitted manuscript and its revision; and agree the submission of manuscripts for this journal. All authors should have made substantial contributions to the concept and design of the research, acquisition of the data and its analysis; drafting of the manuscript and correcting of the revision. All authors must be responsible for the quality, accuracy, and ethics of the work.

Ethics Author(s) must obedient to the law and/or ethics in treating the object of research and pay attention to the legality of material sources and intellectual property rights.

Copyright If the manuscript is accepted for publication, the author(s) still hold the copyright and retain publishing rights without restrictions. Authors are allowed to reproduce articles as long as they are not used for commercial purposes. For the new invention, authors are suggested to manage its patent before published.

Open access The journal is committed to free-open access that does not charge readers or their institutions for access. Readers are entitled to read, download, copy, distribute, print, search, or link to the full texts of articles, as long as not for commercial purposes. The license type is CC-BY-NC-SA.

Acceptance Only articles written in U.S. English are accepted for publication. Manuscripts will be reviewed by editors and invited reviewers (double blind review) according to their disciplines. Authors will generally be notified of acceptance, rejection, or need for revision within 1 to 2 months of receipt. Manuscripts will be rejected if the content does not in line with the journal scope, does not meet the standard quality, is in an inappropriate format, contains complicated grammar, dishonesty (i.e. plagiarism, duplicate publications, fabrication of data, citations manipulation, etc.), or ignoring correspondence in three months. The primary criteria for publication are scientific quality and biological significance. **Uncorrected proofs** will be sent to the corresponding author by email as .doc or .docx files for checking and correcting of typographical errors. To avoid delay in publication, corrected proofs should be returned in 7 days. The accepted papers will be published online in a chronological order at any time, but printed in January, April, July and October.

A charge Starting on January 1, 2017, publishing costs waiver is granted to foreign (non-Indonesian) authors who first publish the manuscript in this journal, especially for graduate students from developing countries. However, other authors are charged USD 250 (IDR 3,500,000).

Reprints The sample journal reprint is only available by special request. Additional copies may be purchased when ordering by sending back the uncorrected proofs by email. Manuscript preparation Manuscript is typed on A4 (210x297 mm²) paper size, in a single column, single space, 10-point (10 pt) Times New Roman font. The margin text is 3 cm from the top, 2 cm from the bottom, and 1.8 cm from the left and right. Smaller lettering size can be applied in presenting table and figure (9 pt). Word processing program or additional software can be used, however, it must be PC compatible, use the *Biodiversitas* template, and Microsoft Word based (.doc or .rtf, not .docx).

Scientific names of species (incl. subspecies, variety, etc.) should be written in italics, except in italicised sentences. Scientific names (Genus, species, author), and cultivar or strain should be mentioned completely for the first time mentioning it in the body text, especially for taxonomic manuscripts. The Genus name can be shortened after first mention, except where this may generate confusion. Name of the author can be eliminated after first mentioning. For example, *Rhizopus oryzae* L. UICC 524, hereinafter can be written as *R. oryzae* UICC 524. Using trivial names should be avoided. **Biochemical and chemical nomenclature** should follow the order of the IUPAC - IUB. For DNA sequence, it is better used Courier New font. Standard chemical abbreviations can be applied for common and clear used, for example, completely written butilic hydroxyl toluene (BHT) to be BHT hereinafter. **Metric measurements** should use IS denominations, and other system should use equivalent values with the denomination of IS mentioned first. Abbreviations like g, mg, mL, etc. should not be followed by a dot.

Minus index (m-2, L-1, h-1) suggested to be used, except in things like "per-plant" or "per-plot". **Mathematical equations** can be written down in one column with text, in that case can be written separately. **Numbers** one to ten are written in words, except if it relates to measurement, while values above them written in number, except in early sentence. The fraction should be expressed in decimal. In the text, it should be used "%" rather than "percent". Avoid expressing ideas with complicated sentence and verbiage, and used efficient and effective sentence.

The **Title** of the article should be written in compact, clear, and informative sentence, preferably not more than 20 words. Author name(s) should be completely written. Name and institution address should also be completely written with street name and number (location), postal code, telephone number, facsimile number, and email address. Manuscripts written by a group, author for correspondence along with address is required. First page of the manuscript is used for writing above information.

The **Abstract** should not be more than 200 words. Include between five and eight **Keywords**, using both scientific and local names (if any), research themes, and special methods which used; and sorted from A to Z. All important **abbreviations** must be defined at their first mention. Running title is about five words. The **Introduction** is about 400-600 words, covering the background and aims of the research. **Materials and Methods** should emphasize on the procedures and data analysis. **Results and Discussion** should be written as a series of connecting sentences, however, for manuscript with long discussion should be divided into subtitles. Thorough discussion represents the causal effect mainly explains for why and how the results of the research were taken place, and do not only re-express the mentioned results in the form of sentences. A **Conclusion** should be given at the end of the discussion. **Acknowledgments** are expressed in brief; all sources of institutional, private and corporate financial support for the work must be fully acknowledged, and any potential conflicts of interest must be noted.

Figures and Tables of three pages maximum should be clearly presented. Include a label below each figure, and a label above each table (see example). Colored figures can only be accepted if the information in the manuscript can lose without those images; chart is preferred to use black and white images. Author could consign any picture or photo for the front cover, although it does not print in the manuscript. All images property of others should be mentioned source. There is no **Appendix**, all data or data analysis are incorporated into Results and Discussions. For broad data, supplementary information can be provided on the website.

References In the text give the author names followed by the year of publication and arrange from oldest to newest and from A to Z. In citing an article written by two authors, both of them should be mentioned, however, for three and more authors only the first author is mentioned followed by et al., for example: Saharjo and Nurhayati (2006) or (Boonkerd 2003a, b, c; Sugiyarto 2004; El-Bana and Nijs 2005; Balagadde et al. 2008; Webb et al. 2008). Extent citation as shown with word "cit" should be avoided. Reference to unpublished data and personal communication should not appear in the list but should be cited in the text only (e.g., Rifai MA 2007, pers. com. (personal communication); Setyawan AD 2007, unpublished data). In the reference list, the references should be listed in an alphabetical order. Names of journals should be abbreviated. Always use the standard abbreviation of a journal's name according to the **ISSN List of Title Word Abbreviations** (www.issn.org/2-22661-LTWA-online.php). Brood care behaviour of the painted stork (<i>Mycteria leucocephala</i>) in Peninsular Malaysia MOHD AMIR ZAKARIA, UMMI NUR SYAFIQAH DAUD, MOHAMMAD SAIFUL MANSOR, SHUKOR MD. NOR	5406-5411
Agrobiodiversity and plant use categories in coffee-based agroforestry in East Java, Indonesia IRMA ARDI KUSUMAWATI, MILA OKTAVIA MARDIANI, EKA PURNAMASARI, JATI BATORO, MEINE VAN NOORDWIJK, KURNIATUN HAIRIAH	5412-5422

Isolation and identification of potential host probiotic bacteria from Malaysian mahseer, <i>Tor tambroides</i> (Bleeker, 1854) for aquaculture practices MOHAMMOD KAMRUZZAMAN HOSSAIN, SHUMPEI IEHATA, NOORDIYANA MAT NOORDIN, MD. ABDUL KADER, SHARIFAH NOOR EMILIA, YEONG YIK SUNG, AMBOK BOLONG ABOL-MUNAFI	5423-5430
Potential biocontrol agent of indigenous <i>Bacillus</i> sp. EG6.4: Molecular identification, larvicidal toxicity, and mechanism of actions SALAMUN., RIZKY DANANG SUSETYO, FARAH AISYAH NAFIDIASTRI, RIZKI AMALIAH ZAIN, ROSSY PERMATA SARI, ALMANDO GERALDI, FATIMAH, NI'MATUZHROH,	5431-5438
Coelomocyte activity and pathogenicity description of nypa palm worm (<i>Namalycastis rhodochorde</i>) after injection with <i>Aeromonas</i> sp. NrBF9 isolated from fecal pellets of nypa palm worm A.H. YANTI, R. KURNIATUHADI, T.R. SETYAWATI, R. RAMADANI	5439-5445
Application of selection index for rice mutant screening under a drought stress condition imposed at reproductive growth phase MAMIK SARWENDAH, ISKANDAR LUBIS, AHMAD JUNAEDI, BAMBANG SAPTA PURWOKO, DIDY SOPANDIE, AZRI KUSUMA DEWI	5446-5452
Prey composition and correlation between morphometry and prey biomass weight of the endemic <i>Nepenthes bicalcarata</i> in Kalimantan, Indonesia HENDRA SETIAWAN, LUCHMAN HAKIM, ADJI ACHMAD RINALDO FERNANDES, CATUR RETNANINGDYAH	5453-5460
Pathogenicity of entomopathogenic fungi isolated from <i>Periplaneta americana</i> against <i>Dolichoderus</i> sp. EMANTIS ROSA, RIZKA DWI DAMAYANTI, JENSA YUSWANTORO, RACHMAT NUGRAHA INDRA, PUTRI OKTARIANA, M. FARIZ FADILLAH MARDIANTO, ACHMAD ARIFIYANTO	5461-5468
Response of morpho-physiological traits to drought stress and screening of curly pepper (<i>Capsicum annuum</i>) genotypes for drought tolerance ROSMAINA, AHMAD RIDHO, ZULFAHMI,	5469-5480
Studying the relationship of immersion duration and characteristics of natural materials FAD to fish aggregation in the sea ARHAM RUMPA, NAJAMUDDIN, SAFRUDDIN, MUHAMMAD ABDUH IBNU HAJAR	5481-5490
Genetic variability and phylogenetic relationships of <i>Begonia multangula</i> based on <i>atpB-rbcL</i> noncoding spacer of cpDNA sequences TRI WARSENSO, MUHAMMAD EFENDI, ABDUL RAZAQ CHASANI, BUDI SETIADI DARYONO	5491-5501
Diversity of bacterial phenol hydroxylase-encoding genes from gasoline-contaminated silt soil SURAJ RAJAN VASANDANI, WATUMESA AGUSTINA TAN	5502-5506
Comparative study of morphophysiological responses among cowpea and long beans plants under drought stress condition ELLY SYAFRIANI, KARTIKA RESTU SUSILO, RAHMI SRI SAYEKTI, MUHAMMAD HABIB WIDYAWAN, NABILAH SALMA KHOIRUNNISA, MUTIARI RAHMADHANI	5507-5518
Diversity and activity of amylase-producing bacteria isolated from mangrove soil in Thailand RATIMA KLINFOONG, CHANUNLAYA THUMMAKASORN, SUNISA UNGWIWATKUL, PARIMA BOONTANOM, AIYA CHANTARASIRI	5519-5531
The bioecological features of some species of the Cupressaceae introduced in the conditions of Tashkent city (Uzbekistan) ELDOR E. TEMIROV, NARGIZA K. RAKHIMOVA	5532-5538
