

## Kesmas: National Public Health Journal

Kesmas: National Public Health Journal    Announcements    Vol 14, No 2 (2019): Volume 14, Issue 2, November 2019

**Kesmas: National Public Health Journal** as the name change of Kesmas: Jurnal Kesehatan Masyarakat Nasional is a journal published by Faculty of Public Health Universitas Indonesia since August 2006 and has been accredited by Ministry of Research, Technology and Higher Education in July 2009 then re-accredited in 2012 (No.56/DIKTI/Kep/2012) and 2018 (No.30/E/KPT/2018) with Sinta 2, an Indonesian national accreditation, year 2017 - 2021. Our journal is published quarterly in February, May, August, and November.

**Kesmas: National Public Health Journal** is on public health as discipline and practices related to preventive and promotive measures to enhance the health of the public through scientific approach applying a variety of techniques. This focus includes areas and scopes such as biostatistics, epidemiology, health education and promotion, health policy and administration, environmental health, public health nutrition, sexual and reproductive health, and occupational health and safety.

**Kesmas: National Public Health Journal** was first published every two months since August 2006 with 50 pages in every edition and purple cover. Then from August 2012 to February 2014, our journal was published monthly and orange peach cover with picture. Due to managerial restructuring since May 2014, our journal has been published quarterly (February, May, August, November) with an additional number of the page to 100 pages from 50 pages in every edition and the orange peach cover without any picture. In order of internationalization of journal since August 2015, every edition now consists of 50 pages and articles both in Indonesian (Bahasa Indonesia) and English.

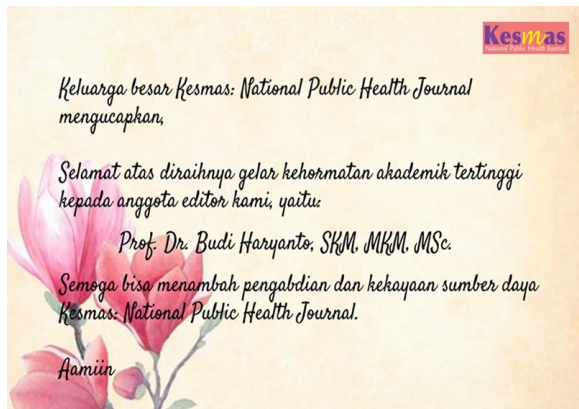

Since August 2016 (Volume 11 Issue 1), we publish the journal with the new name as Kesmas: National Public Health Journal consisting of articles in English.

The journal employs a peer-review mechanism where each submitted article should be anonymously reviewed by expert peers appointed by the editor. Articles published in this journal could be in the form of an original article and invited review article.

**Kesmas: National Public Health Journal** opens submission for a **special edition** with a thematic issue, supplement, and proceeding. For further information, please contact us by phone +62815-1141-6600 or e-mail: [jurnalkesmas.ui@gmail.com](mailto:jurnalkesmas.ui@gmail.com).

Kesmas: Jurnal Kesehatan Masyarakat Nasional (Kesmas: National Public Health Journal) is Accredited by Director General of Higher Education, Ministry of Research, Technology and Higher Education (No.30/E/KPT/2018)

## Stigma Masyarakat terhadap Orang dengan HIV/AIDS

Zahroh Shaluhiyah, Syamsulhuda Budi Musthofa, Bagoes Widjanarko

### Abstract

#### Abstrak

Kabupaten Grobogan merupakan kabupaten dengan peningkatan kasus HIV/AIDS cukup tajam dibandingkan kabupaten lain di Jawa Tengah. Penelitian ini bertujuan untuk mengidentifikasi stigma masyarakat terhadap orang dengan HIV/AIDS (ODHA) dan faktor yang memengaruhinya. Penelitian explanatory ini dilakukan melalui pendekatan studi potong lintang dengan sampel berjumlah 300 kepala keluarga yang dipilih menggunakan sampel acak proporsional pada tiga kelurahan dengan kasus HIV tertinggi selama Agustus - September 2014. Pengumpulan data dilakukan melalui wawancara tatap muka menggunakan kuesioner terstruktur. Sedangkan analisis data dilakukan secara univariat, bivariat menggunakan kai kuadrat, dan multivariat menggunakan regresi logistik. Sebagian besar responden adalah laki-laki dengan tingkat pendidikan terbanyak sekolah menengah atas ke bawah. Separuh responden masih memberikan stigma terhadap ODHA. Responden dengan keluarga yang memberikan stigma memiliki kemungkinan memberikan stigma terhadap ODHA empat kali lebih besar dibandingkan responden yang keluarganya tidak memberikan stigma. Demikian juga responden yang berpersepsi negatif terhadap ODHA memiliki kemungkinan memberikan stigma dua kali lebih besar dibandingkan yang berpersepsi positif. Faktor sikap tetangga dan tokoh masyarakat terhadap ODHA juga berhubungan signifikan dengan stigma responden terhadap ODHA. Kesimpulannya adalah sikap keluarga dan persepsi responden terhadap ODHA merupakan faktor yang berpengaruh pada munculnya stigma terhadap ODHA sehingga disarankan adanya pemberian informasi tentang HIV/AIDS yang lengkap kepada keluarga dan masyarakat untuk menurunkan atau menghilangkan stigma.

#### Abstract

Grobogan District is a district with a sharp increasing of HIV/AIDS case compared to other districts over Central Java. This study aimed to identify public stigma to people living with HIV/AIDS (PLWHA) and influencing factors. This explanatory study was conducted using cross sectional design worth 300 family head samples selected by using proportional random sampling on three subdistricts with highest HIV case within August - September 2014. Data collecting was conducted through face-to-face interview using structured questionnaire. Meanwhile, data analysis was conducted in univariate, bivariate using chi square and multivariate using logistic regression. Most respondents were men whose education level was mostly high school to the bottom level. Half of respondents were still stigmatizing PLWHA. Respondents whose families stigmatized had possibility of stigmatizing four times bigger than respondents whose families did not. Similarly, respondents holding negative perceptions toward PLWHA had possibility of stigmatizing twice bigger than those holding positive perceptions. Attitude of neighbors and public figures toward PLWHA also significantly related to respondent's stigma to PLWHA. To sum up, family attitude and respondent's perception to PLWHA were influencing factors of emerging stigma toward PLWHA. Therefore, it suggested that providing families and public any complete information about HIV/AIDS may decrease or remove the stigma.

### Keywords

HIV/AIDS; stigma masyarakat; orang dengan HIV/AIDS
