A comparative analysis between integrated occupational safety and health management system in a support mining company and the Indonesian Mining Safety Management System (Article)

Ratar, E.H.^a , Denny, H.M.^b, Rahfiludin, M.Z.^b ^aFaculty of Public Health Diponegoro University, Jl. Prof. Soedarto, SH Tembalang, Semarang, Central Java 1269, Indonesia^bFaculty of Public Health Diponegoro University, Jl. Prof. Soedarto, SH Tembalang, Semarang, Central Java 1269, Indonesia

Abstract

[View references \(9\)](#)

A support mining company implements the main company's, Occupational Safety and Health Management System (OSH-MS) called "FRESH" Management System. Meanwhile, the current management system of the Indonesian Mining Safety Management System has to fulfilled by all mining company, regardless main or support or sub-contractor company. This research aimed to analyze the fulfilment of the existing integrated Occupational Safety and Health Management System toward the Indonesian Mining Safety Management System. The approach of this action research was a qualitative design. The subject of this research was the Occupational Safety and Health Management System of a supporting company called "X". Data was gathered from the implementation of the "Hazard Identification Risk Assessment and Determination Control (HIRADC)" as well as the existing integrated Occupational Safety and Health Management System included the person in charge as to be matched with the Indonesian Mining Safety Management System This study resulted in a new format of standardized elements of Occupational Safety and Health Management System for the company X in accordance with the Government Regulation of Republic Indonesia Mining Safety Management System. The result indicated that a positive feedback from the company's top management to make a pilot project using the new format standard of the supporting company "X." In conclusion the new design from this study is implemented. © 2019, Indian Journal of Public Health Research and Development. All rights reserved.

Online published on 20 March, 2019.

Abstract

A support mining company implements the main company's, Occupational Safety and Health Management System (OSH-MS) called "FRESH" Management System. Meanwhile, the current management system of the Indonesian Mining Safety Management System h to fulfilled by all mining company, regardless main or support or sub-contractor company.

This research aimed to analyze the fulfilment of the existing integrated Occupational Safety and Health Management System toward Indonesian Mining Safety Management System.

The approach of this action research was a qualitative design. The subject of this research was the Occupational Safety and Health Management System of a supporting company called "X". Data was gathered from the implementation of the "Hazard Identification R Assessment and Determination Control (HIRADC)" as well as the existing integrated Occupational Safety and Health Management System included the person in charge as to be matched with the Indonesian Mining Safety Management System

This study resulted in a new format of standardized elements of Occupational Safety and Health Management System for the compai in accordance with the Government Regulation of Republic Indonesia Mining Safety Management System. The result indicated that a positive feedback from the company's top management to make a pilot project using the new format standard of the supporting comp "X." In conclusion the new design from this study is implemented.
