Subject: [IJG] Editor Decision: Major Revision Required [DELETE](#)

---

Dear Dr Endah Sri Hartatik,

After considering reviewer's comments (see the attachment in your OJS account), We have reached the decision to Accept your manuscript with major revision regarding your submission to Indonesian Journal of Geography, "Road Transportation Development and Landscape Changes in Semarang Central Java, Indonesia".

You should improve the quality of your manuscript by revising your manuscript according to the reviewer's comments. Please carefully respond to reviewer's comments when submitting the revision and please clearly indicate the changes that you made (or highlight them) to address the reviewer's comments. Or, you can directly reply to reviewer's comments in the comments box written by the reviewer. You should also use the template attached below. We will not process any revised paper without a specific response to each reviewer's comments

Once again, thank you for submitting your manuscript to the Indonesian Journal of Geography and I look forward to receiving your revision no later than 30 days from now. If you failed to meet the deadline, we may have to consider your paper rejected.

NB: Please use the follow the guideline in the attached template for your revision.

Best wishes,  
Eko Haryono

Subject: [IJG] Editor Decision: Revision Required [DELETE](#)

Dear Dr Endah Sri Hartatik,

We did not find that you have responded to the reviewer's comments.  
Tile list of responses that you already made must be made in a separate file and directly replay in the comment box in your manuscript. File with reviewer comments can be downloaded in OJS.  
Here are the previous comments that I already sent to you.

1. Landscape is not clearly defined, either in the abstract and methods
2. City agglomeration was not presented in the result. It needs urban area development data or map series
3. To have a better idea for the readers, a field photograph is necessary included in the passages. Organize the photographs mentioned in the result to become one or two figures. One figure may contain two or four photographs
4. In addition to narrative passages, a graphical representation of the historical development is needed,
5. Title of Table 1 does not match the table content
6. Important places mentioned in the passages must be indicated in the map. These places will not be understood by readers from outside Semarang
7. This caption in Fig 1 is not clear, is it a comparison of the road networks between 1970 and 1990? Make these two figures become one image., and indicate by 'a' and 'b'
8. Please elaborate on the urban landscape changes. A figure is needed to illustrate the changes. The figure could be a combination of map and a photograph
9. Acknowledgment is not complete yet

Besides, English proofreading is needed.

You may use <https://goodlingua.com/> services (our trusted English proofread service) or you may also use other services.

Please send the revised version along with the certificate

Subject: [IJG] Editor Decision: more revision Required

[DELETE](#)

Dear Dr Endah Sri Hartatik,

The revision did not address the review comment yet, especially the detail concept of landscape or city landscape. City landscape sometime physically means a dense accumulation of building structures with a rich stylistic variety of shapes, and sizes. What is city landscape meant in the paper what the variables/parameters to describe the city landscape. The result and discussion must be in agreements with the concept of the city landscape.

Goals of the research is not mention clearly in the introduction. It must be put in the end of the introduction.

Citation of figure/table must be put before the figure/table. We found table 5 is put above the reference text.

Please cite one or tow relevant paper from IJG and make sure that you usus APA style version 6th or 7th.

Best wishes,

Subject: [IJG] Editor Decision: Minor Revision Required

[DELETE](#)

Dear Dr Endah Sri Hartatik,

Land use change seems more appropriate than spatial change since the information (figure 3) is more of an example of land-use change

Other land use changes in different periods are needed. The data can be drawn from old maps and new maps. And make sure that the local name described in the text is indicated on the map, otherwise can not be understood by readers, not from Semarang.

Best wishes,

[DELETE](#)

Dear Dr Endah Sri Hartatik,

Figure 5 is not readable.

It is not acceptable to only copy an original image for publication.

It must be redrawn, and the caption must mention the original source of the map.

Best wishes,  
Editor in Chief

Subject: [IJG] Editor Decision: Accept Manuscript [DELETE](#)

---

Dear Dr Endah Sri Hartatik,

Congratulations! After considering your responses to reviewer's comments, We have reached the decision regarding your submission to Indonesian Journal of Geography, "Road Transportation Development and Landscape Changes in Semarang Central Java, Indonesia" to Accept your manuscript to be published in Indonesian Journal of Geography.

You will receive emails regarding the details of your publication. We may also request a technical edit of your manuscript if necessary.

The Indonesian Journal of Geography requires manuscripts to be written in good and correct English, so if you or one of your co-authors are not English native speakers, please provide us proof that your manuscript has gone through the proofread stage, as evidenced by a certificate from the proofreading company/services.

If your manuscript has not gone through the proofread stage and or does not have a certificate, you can use the proofreading services that have collaborated with us and claim a 5% discount via the following link <https://goodlingua.com/>

Thank you for submitting to the Indonesian Journal of Geography and we look forward to receiving your manuscript in the future.

Best wishes,  
Eko Haryono
