KOMENTAR/ULASAN PEER REVIEW

Kelengkapan dan Kesesuaian Unsur : Karya ilmiah disusun sesuai dengan panduan. Unsur yang telah lengkap dari abstract, introduction, methods, result, discussion, dan references. Karya ilmiah disusun sesuai dengan kaidah etika.

Ruang Lingkup dan Kedalaman Pembahasan : Ruang lingkup penelitian sesuai dengan bidang ilmu peneliti. Fermentasi kefir susu kambing yang difortifikasi dengan vitamin D3 yang menurunkan total leukosit pada model tikus diabetes.

Kecukupan & Kemutakhiran Data & Metodologi : Penelitian eksperimental dengan pre post group design dan model tikus diabetes yang diinduksi STZ/NA. Darah diambil dan diproses untuk pengukuran glukosa darah dengan metode GOD-PAP dan perhitungan total leukosit menggunakan Mindray BC-2800Vet automatic hematology analyzer. Terdapat referensi dengan > 10 tahun terakhir.

Kelengkapan Unsur dan Kualitas Penerbit : Penerbit lengkap memuat volume, tahun, dan daftar isi serta terindeks di SCOPUS, dengan SJR 0.24

SCOPE

Nutrition & Food Science* (NFS) is an international, double blind peer-reviewed journal offering accessible and comprehensive coverage of food, beverage and nutrition research. The journal draws out the practical and social applications of research, demonstrates best practice through applied research and case studies and showcases innovative or controversial practices and points of view. The journal is an invaluable resource to inform individuals, organisations and the public on modern thinking, research and attitudes to food science and nutrition. NFS welcomes empirical and applied research, viewpoint papers, conceptual and technical papers, case studies, meta-analysis studies, literature reviews and general reviews which take a scientific approach to the following topics: -Attitudes to food and nutrition -Healthy eating/nutritional public health initiatives, policies and legislation -Clinical and community nutrition and health (including public health and multiple or complex co-morbidities) -Nutrition in different cultural and ethnic groups -Nutrition during pregnancy, lactation, childhood, and young adult years -Nutrition for adults and older people -Nutrition in the workplace -Nutrition in lower and middle income countries (incl. comparisons with higher income countries) -Food science and technology, including food processing and microbiological quality -Genetically engineered foods -Food safety / quality, including chemical, physical and microbiological analysis of how these aspects effect health or nutritional quality of foodstuffs
