- Abstract section: The number of Low Birth Weight (LBW) in Indonesia is still high because of, among others, the lack of mothers' knowledge to prevent LBW case. The solution proposed is to encourage *Dasa Wisma* (*Dawis*) activists to assist pregnant women as one of the strategic actions. The aim of the research was to analyze the effect of assistance training towards the knowledge and practices of *Dawis* activists related to the prevention of LBW case in pregnant women. Method of this research was pretest and posttest without control group design of Quasi-experimental were applied. The population sampled using purposive random sampling was 37 *Dawis* activists in Tlogosari Village District, Semarang. The distance between pretest and posttest was analyzed by paired sample t-test result of $t = 1.7 / 5$. Test result of $t = 1.7 / 5$ showed that there were significant differences in the knowledge ($p < 0.05$) and practices ($p < 0.05$) of *Dawis* Activists before and after the intervention of assistance training. In the end of this research, the knowledge of *Dawis*

Abstract.
The number of Low Birth Weight (LBW) in Indonesia is still high because of, among others, the lack of mothers' knowledge to prevent LBW case. The solution proposed is to encourage Dasa Wisma (Dewis) activists to assist pregnant women as one of the strategic actions. The aim of the research was to analyze the effect of assistance training towards the knowledge and practices of Dewis activists related to the prevention of LBW case in pregnant women. Method of this research was pretest and posttest without control group design of Quasi-experimental were applied. The population sampled using purposive random sampling was 37 Dewis activists in Kecamatan Telogwulan, Tembalang, Semarang. The distance between pretest and posttest was an average of 1 month. The result of paired sample t-test revealed that there were significant differences in the knowledge ($p < 0.05$) and practices ($p < 0.05$) of Dewis Activists before and after the intervention of assistance training. In the end of this research, the knowledge of Dewis

Dear authors

Sehubungan dengan lamanya proses publikasi di MJPHM dimana sampai saat ini per tanggal ini proses masih di tahap verifikasi (belum review dst).

Oleh karenanya kami menawarkan apakah ingin artikel authors dipublikasikan di IJPHRD (Indian journal of Public health research and development) yang sesuai pengalaman jauh lebih cepat.

Untuk mengingatkan berikut judul artikel authors.

1. NUTRITIONAL CONTENT AND QUALITY ANALYSIS OF PALM SUGAR IN PLEDOKAN VILLAGE, SUMOWONO
Fahmi Arifan1, Sri Winarni2, RTD. Wisnu Broto1, Ariza Fuadi3,Hafiz Rama Devara1, Dina Elviana1
2. FACTORS CAUSING THE HIGH UNMET NEED IN TEGAL AND KLATEN REGENCY
Sri Winarni1*, Najib2, Yudhy Dharmawan1, Desi Nuri2
3. EFFECT OF TRAINING TO KNOWLEDGE AND PRACTICES OF DASA WISMA ACTIVISTS AS PREGNANT WOMEN ASSISTANTS IN PREVENTING LOW BIRTH WEIGHT
