## [JAU] Editor Decision

2018-12-20 09:55 AM

Atiek Suprapti, agung budi sardjono, indriastjario Indriastjario, Edward E Pandelaki:

We have reached a decision regarding your submission to Journal of Architecture and Urbanism, "The Spatial Setting of Cultural Heritage Village toward a Tourism Development; A Case Study of Kadilangu Demak Indonesia".

Our decision is: Revisions Required

Arnoldas Gabrėnas  
tpa@vgtu.lt

-----  
Reviewer A:

This paper is good. The author is already explaining the history of its location as a research site. This paper is already giving a details analysis of each building and also giving a big picture of how the site is changing due to the development into a tourism area. Not only about that, a detail hierarchial spatial analysis that is done by the author is good for explaining how the function of each space is used and how its changing by the time.

the revision that need to do is explaining how the big impact for the local community, because spatial discussion always including the actor in it.

Recommendation: Revisions Required

-----  
Reviewer C:

The spatial concept as the research findings will be significant potency to develop the cultural heritage tourism.

The spatial concept as the research findings will be significant potency to develop the cultural heritage tourism.

The references and methodology used are appropriate for achieving the research objectives, so the findings obtained are clear and complete.

The included picture is sufficient to explain and support the text delivered, although in some images (figures 6 and 10) the text contained in the image is unreadable.

Need to recheck the suitability of the description in writing:

*"The structure of spatial setting consists of **five elements** namely (1) the House of Kasepuhan, (2) The residence for commoners, (3) the Islamic boarding school, (4) The mosque and cemetery."*

Which is correct, 5 elements or 4 elements as mentioned in the description?

*"Meanwhile the commoners houses includes sentono (guard faction), merbat (caretaker faction), and magersari (courtiers faction) have a simple spatial arrangements, more humble, less ornament, and with gable roof (see. Commoner houses are no fenced and more open."*

Does the word mean to refer to a particular image?

*"(Hall, 1996) in (Rapoport, 1983; 2000) explained that the fixed space is formed by (1) fixed feature elements, (2) semi fixed features elements, (3) non-fixed feature elements."*

What do you mean?

It is necessary to readjust the research findings written in the abstract with the findings described in the conclusions.

The finding research is the spatial concept, it should be the tittle more appropriate "The Spatial Concept ... " not "The Spatial Setting.....", so that the keywords used is spatial concept, not spatial setting.

Recommendation: See Comments

---

Yes, this is fine.

I think it's perfect!

I don't agree.
