Dear *Tabitha Lillywhite*  
Assistant Editor of F1000Research

I hope you are doing well, also hope this mail finds you well!

Sorry for the delay in submitting the revision. Because we made major improvements, in order to improve the quality of this paper and of course its readability.

Please find the attached files.

Here are our latest notes:

1. We added the latest 3 Contributors who are also co-authors. Please help with changes in the website submission system.
2. Please change the corresponding author, referring to the attached manuscript file (**only Adriyan Pramono, PhD is the corresponding author**).
3. Please update funding information: **Was supported by the RPIBT scheme with the funding number of 185-95/UN7.6.1/PP/2021**.
4. Please change for payment invoice to:

**Adriyan Pramono, PhD**

Assistant Professor

Department of Nutrition

Faculty of Medicine, Diponegoro University

Chair of Center of Nutrition Research (CENURE)

Jl. Prof. Soedarto, Tembalang-Semarang 50275, Central Java, Indonesia. [adriyanpramono@fk.undip.ac.id](mailto:adriyanpramono@fk.undip.ac.id)

5. For further communication (including further revisions, etc.) please contact [adriyanpramono@fk.undip.ac.id](mailto:adriyanpramono@fk.undip.ac.id) (as Corresponding author), and only cc to me ([nmayulu@unsrat.ac.id](mailto:nmayulu@unsrat.ac.id))

I hope you will receive this revision well.

I await good news from you soon.

Best regards,

**Assoc. Prof. Dr. Nelly Mayulu, MD., M.Si., Sp.KKLP**

Peer reviewer of *F1000Research*, and *Open Access Macedonian Journal of Medical Sciences*

Pada tanggal Sen, 4 Apr 2022 pukul 15.55 F1000.Research <[research@f1000.com](mailto:research@f1000.com)> menulis:

Dear Nelly,

Thank you for sending your revised article. There are several comments remaining in the manuscript; please address these. Also, please address the following important queries:

**Reporting guidelines:** We ask that authors include a **completed PRISMA flow diagram with their article**. This will come under the 'Reporting guidelines' heading in the *Data availability* section. Please note the PRISMA flow diagrams have been updated, so please choose the most appropriate for your study.

We ask that authors submit their flow diagram to an online repository. More information can be found on [our data guidelines page](#). Please create a public registry in order to create a DOI and assign a license to the data (we would strongly suggest a CC0 license). Please include the name of the repository, the project title and the DOI in the *Data availability* section, along with the license the data is held under.

Furthermore, **please update your uploaded PRISMA checklist** to ensure that it corresponds to the revised article. When completing the checklist, we would recommend indicating in which section/table/figure each item has been addressed rather than page number, as page numbers are likely to change during revisions and typesetting.

**Co-author email address:** The email address for **Andisty Ate** bounced ([andistyate019@student.unsrat.ac.id](mailto:andistyate019@student.unsrat.ac.id)). Please could you provide an alternative email address for **Andisty Ate** so that we can contact them about the submission.

**Reviewers:** To avoid delay to the publication process, **we need you to provide us with at least five potential reviewers** who meet our reviewer criteria before we can publish your article - please be aware that it is likely we will need to request further reviewer suggestions after publication. Please go to your [Suggest Reviewers](#) page, where you will find a useful tool to help you find reviewers; use this page to track the progress of the peer review process for your article. You can access this page directly via the article's record under My Research >> Submissions. See also our [reviewer criteria and tips for finding reviewers](#). Please remember that suggested reviewers should have appropriate level of experience and the right expertise to judge your article; they must be able to provide an unbiased report (e.g. they must not be recent collaborators or colleagues in your institute). All reviewer suggestions are checked by the editorial team and will be rejected if they do not meet our criteria.

Best wishes,

**Tabitha Lillywhite**

Dear Nelly

A systematic review and meta-synthesis on the effect of dietary modification on executive function in obese patients

Pertiwi JM, Kaseke MM, Mayulu N, Susanto D, Ate A, Rizal M and Nurkolis F

Thank you for your submission to F1000Research. We have noted a few issues with your manuscript (below) – once these are addressed we will be pleased to accept your article for publication.

**Research Resource Identifiers (RRIDs):** We encourage you to add [RRIDs](#) in order to identify the following types of resources that are included in your article: software tools, data, databases and services. More information on this project is available from the Resource Identification Initiative and RRIDs can be obtained from the portal.

**Reporting guidelines:** We ask that authors include a completed PRISMA [flow diagram](#) with their article. This will come under the 'Reporting guidelines' heading in the *Data availability* section. Please note the PRISMA flow diagrams have been updated, so please choose the most appropriate for your study.

We ask that authors submit their flow diagram to an online repository. More information can be found on [our data guidelines page](#). Please create a public registry in order to create a DOI and assign a license to the data (we would strongly suggest a CC0 license). Please include the name of the repository, the project title and the DOI in the *Data availability* section, along with the license the data is held under.

**Figures:** If these images are re-produced from another publication, please make sure that you have the appropriate permissions. The author is responsible for obtaining permission from the copyright holder (and any fees that are applicable). Please include a note in the legend as follows: '(A) has been reproduced with permission from [*include original publication citation*].' Or please include a note as per the instructions of the copyright holder.

**Methods:** There seems to be some missing information in your Methods. Please bear in mind that reviewers and readers must be exactly able to recreate your study from the level of detail that you give. Track Changes provide comments in the manuscript, but these are not exhaustive.

**Payment:** Since you are a previous reviewer, we would be happy to offer you a 20% discount, bringing the APC to \$1080.00.

**Acknowledgements:** Please confirm that you have obtained permission from the people you would like to acknowledge to be named in the manuscript.

**Co-author email address:** The email address for **Andisty Ate** bounced ([andistyate019@student.unsrat.ac.id](mailto:andistyate019@student.unsrat.ac.id)). Please could you provide an alternative email address for **Andisty Ate** so that we can contact them about the submission.

**Reviewers:** As you know, F1000Research operates an author-driven publication model. This means that you will be responsible for suggesting suitable reviewers, whom we invite on your behalf, giving you an opportunity to ensure that appropriate experts review your article. Our transparent peer review process means that the peer review reports, together with the reviewers' names, will be published alongside your article.

To avoid delay to the publication process, we need you to provide us with at least five potential reviewers who meet our reviewer criteria before we can publish your article - please be aware that it is likely we will need to request further reviewer suggestions after publication. Please go to your [Suggest Reviewers](#) page, where you will find a useful tool to help you find reviewers; use this page to track the progress of the peer review process for your article. You can access this page directly via the article's record under My Research >> Submissions. See also our [reviewer criteria and tips for finding reviewers](#).

Please remember that suggested reviewers should have appropriate level of experience and the right expertise to judge your article; they must be able to provide an unbiased report (e.g. they must not be recent collaborators or colleagues in your institute). All reviewer suggestions are checked by the editorial team and will be rejected if they do not meet our criteria.

**Payment:** As F1000Research is open access, we will require payment of the Article Processing Charge (APC) to be able to complete the processing of your submission. The APC is \$1080.00 after any discounts

you are eligible for have been applied. **Please provide us with the details of the individual/organization taking responsibility for paying the fee as soon as possible.** Please sign in with the credentials you used to submit the article or you will not be able to access this page. Our Accounts department will be in touch regarding payment.

We have also lightly copyedited your article - please [download the document](#) and check you are happy with the amendments and **then address the queries detailed above using track changes in Word.** **Please return your revised manuscript to the e-mail address above.** Please note that this is your final opportunity to make any changes to the content of your manuscript. Once the typeset PDF of your manuscript has been created, we will send you a final PDF proof for checking prior to publication.

Please respond to this email within two weeks addressing any issues raised. After two weeks, we will send you a reminder email to complete your revisions. If we do not hear from you within seven weeks your submission will be withdrawn.

Best wishes,

Tabitha

Subject: RE: Manuscript 110211 conditionally accepted for publication  
To: Nelly Mayulu <nmayulu@unsrat.ac.id>

Dear Nelly,

Thank you for your response, we have sent the Author List Change Request Form for you and your co-authors to complete. While you get this done, please see the comments remaining in the manuscript and address these, as well as the comments on Table 1. Furthermore, as the article has been significantly revised, please address the points below:

**Content:** As part of our pre-publication checks, we use iThenticate software to check that manuscripts have not been published elsewhere and that they are original. We have found that your manuscript is similar to other sources in certain sections (highlighted yellow). We would ask you to re-word these sections.

**Data analysis:** Where proprietary software is used for analysis, we require that details of an open-access alternative that can perform an equivalent function are provided. Please provide these details for Stata software.

**Reporting guidelines:** We ask that authors include a completed PRISMA flow diagram with their article. This will come under the 'Reporting guidelines' heading in the *Data availability* section. Please note the PRISMA flow diagrams have been updated, so please choose the most appropriate for your study.

We ask that authors submit their flow diagram to an online repository. More information can be found on [our data guidelines page](#). Please create a public registry in order to create a DOI and assign a license to the data (we would strongly suggest a CC0 license). Please include the name of the repository, the project title and the DOI in the *Data availability* section, along with the license the data is held under.

**Figure 1:** Figure 1 is missing, please send this over along with a figure legend.

**Supplementary files:** Please note we do not host supplementary material; we now describe any supplementary data to the main manuscript as underlying or extended data. We would suggest that 'Supplementary figure 1' should be included as *extended data*. We ask that authors submit their underlying/extended data to an online repository. More information can be found on [our data guidelines page](#).

Alternatively, since we do not have a limit on figures/tables, you may wish to include the table in the main manuscript. If so, please renumber the tables as appropriate.

When submitting data to an online repository, please ensure you create a DOI, which will be stated and cited in the Data availability section of the manuscript. Please include the name of the repository and the DOI in the Data availability section, along with the license the data is held under (please make sure that you choose a license when submitting your data to a repository – we would strongly suggest a CC0 license).

If you are submitting data to Open Science Framework, please register your project to ensure that a record of this project will remain persistent and unchangeable (an open-ended registration is usually the most appropriate). Once you have registered your project, please create a DOI for this registration by clicking the pencil icon next to 'Registration DOI'. This DOI will be stated and cited in the Data availability section of the manuscript.

To ensure you and your co-authors receive appropriate credit for generating your datasets, please ensure you include the names of all authors involved in producing the data. To maximise the likelihood of your data being cited correctly, we strongly encourage you to link the ORCIDs of every author involved in generating the data, where possible.

**Figures:** If these images are re-produced from another publication, please make sure that you have the appropriate permissions. The author is responsible for obtaining permission from the copyright holder (and any fees that are

applicable). Please include a note in the legend as follows: '(A) has been reproduced with permission from [*include original publication citation*].' Or please include a note as per the instructions of the copyright holder.

**Reviewers:** Thank you for suggesting 16 potential reviewers. Once we proceed to the next stage, these will be checked by the editorial team to ensure they meet our [criteria](#).

Best wishes,

**Tabitha Lillywhite**

Dear Tabitha,

Thanks for your reply!

I confirm that the three additional authors contributed greatly to improving my manuscript.

They helped move from a systematic review to a meta-analysis.

Therefore, there should be this change. Of course, this change is due to wanting to improve the quality of the manuscript. Please send the author change form immediately.

Andisty Ate email: [ate.andisty@gmail.com](mailto:ate.andisty@gmail.com)

Thank you very much!

Best regards,

Nelly
