Catatan Penilaian paper oleh Reviewer :

- Unsur isi paper cukup lengkap.
- Pembahasan didukung 22 pustaka yang sebagian besar bersumber dari pustaka primer (jurnal). Bagian diskusi yang mendialogkan antara temuan dengan landasan teori yang dipergunakan kurang terlihat.
- Metode kuantitatif dengan jumlah sampel 94 yang diperoleh dengan rumus Slovin. Metode penggalan opini secara kuantitatif dengan skala Likert.
- Dipublikasikan oleh E3S Web of Conferences yang terindeks SCOPUS. Seminar diselenggarakan oleh UNDIP dan sebagian besar penulis dari Indonesia.

PREFACE

The 6th International Conference on Energy, Environment, Epidemiology and Information System (ICENIS) 2021, with a theme ***“The Impacts of Covid-19 Pandemic on Water, Environment, Energy, Epidemiology, Information System and Strategies for their Adaptation and Mitigation”***. This conference is expected to designate an interactive international forum to provide a platform for sharing and exchanging information on the latest research on energy, environment, epidemiology, and information system. The ICENIS was conducted annually by the School of Postgraduate Studies Diponegoro University, Semarang Indonesia to stimulate collaboration between researchers, government, and industries to increase community welfare. This conference also facilitates the formation of a network among participants to enhance the quality and benefit of research and development. Although the current situation is uncertain due to pandemic COVID-19, however, the conference is rich and varied with 10 keynote speakers who came from 5 continents: South Africa, America, Australia, Asia (Indonesia, Malaysia), and Europe (Netherland). The 426 papers were presented via online conference within 14 parallel oral sessions each day (4-5 August 2021) that come from various countries, i.e. Japan, Czech Republic, Algeria, Sudan, Uganda, Malaysia, Tanzania, Timor Leste, West Africa, Turkey, Uzbekistan, Taiwan, United Kingdom, and United States, and from all over Indonesia consisting of researchers, lecturers, practitioners, post and undergraduate students belonging to various institutions. There were 187 articles selected to be published on the present conference proceeding in the topic of Culture and Environmental Development in Coastal Community. We would like to express our gratitude to all authors, members of scientific committee and members of organizing committee for their contribution to the success of the conference.

Abstract

Kampung Jawi is one of the cultural tourism destinations in Semarang City. Kampung Jawi was developed to reduce poverty and support sustainable development. However, the sustainability of Kampung Jawi as a tourist destination is currently being threatened by the Covid-19 pandemic. The Covid-19 pandemic caused a decrease in the number of tourists and restrictions on activities in the tourism sector, including economic and socio-cultural activities. This study aims to examine the sustainability of Kampung Jawi as a tourist destination during the Covid-19 pandemic. The sustainability assessment uses indicators based on 3 aspects: socio-cultural, economic, and environmental. This study uses a quantitative method with descriptive and scoring analysis. Descriptive analysis was used to identify the condition of Kampung Jawi tourism components. The assessment of the sustainability of Kampung Jawi as a tourist destination used a scoring analysis. The result of this study shows that the level of sustainability of Kampung Jawi is included in the "Medium" category. The socio-cultural aspect is the most affected aspect by the Covid-19 pandemic and has the lowest score compared to other aspects. Nevertheless, in the pandemic situation, Kampung Jawi still provides economic benefits, cultural preservation, and maintain environmental purity.
