The following message is being delivered on behalf of Indonesian Journal of Electrical Engineering and Computer Science.

Dear Prof/Dr/Mr/Mrs: Dr. Dania Eridani,

Thank you for submitting the manuscript, "Internet of Things based Attendance System on Smart Classroom" to Indonesian Journal of Electrical Engineering and Computer Science. With the online journal management system that we are using, you will be able to track its progress through the editorial process by logging in to the journal web site:

Manuscript URL:
<http://ijeecs.iaescore.com/index.php/IJEECS/author/submission/22661>
Username: deridani

If you have any questions, please contact me. Thank you for considering this journal as a venue for your work.

Tole Sutikno
Indonesian Journal of Electrical Engineering and Computer Science

Editor Subject: [IJEECS] Editor Decision

[DELETE](#)

2020-06-15 05:28 AM

The following message is being delivered on behalf of Indonesian Journal of Electrical Engineering and Computer Science.

-
- Authors must strictly follow the guide for authors
 - MS Word: <http://iaescore.com/gfa/ijeecs.docx>
 - LaTeX format: <http://iaescore.com/gfa/ijeecs.rar>
 - Research Paper: min 25 references (primarily to journal papers)
 - Review Paper: min 50 references (primarily to journal papers)
-

Dear Prof/Dr/Mr/Mrs. Dr. Dania Eridani,

We have reached a decision regarding your paper submission entitled "Internet of Things based Attendance System on Smart Classroom" to Indonesian Journal of Electrical Engineering and Computer Science, a Scopus indexed journal (SJR 2017: 0.182, Q3 on Electrical and Electronic Engineering, Q3 on Computer Networks and Communications, Q3 on Hardware and Architecture, Q3 on Signal Processing)..

Our decision is: Revisions Required.

Authors should have made substantial contributions. Read the checklist for preparing your final paper for publication at:

<http://ijeecs.iaescore.com/index.php/IJEECS/about/editorialPolicies#custom-3>. Please try to follow the format as closely as possible.

For ORIGINAL/RESEARCH PAPER, the paper should be presented with IMRaD model:

1. Introduction (I)
2. The Proposed Method/Algorithm/Procedure specifically designed (optional). Authors may present complex proofs of theorems or non-obvious proofs of correctness of algorithms after introduction section (obvious theorems & straightforward proofs of existing theorems are NOT needed).
3. Method (M)
4. Results and Discussion (RaD)
5. Conclusion.

A high quality research paper MUST has:

- (1) a clear statement of the problem the paper is addressing;
- (2) the proposed solution(s); and
- (3) results achieved. It describes clearly what has been done before on the problem, and what is new.

The goal of this revision is to describe NOVEL TECHNICAL RESULTS. There are four (4) types of technical results:

- (a) A theory: consisting of a collection of theorems.
- (b) An algorithm/method/approach/framework/ ;
- (c) A system construct: such as hardware design, software system, protocol, etc.; The main goal of your revised paper is to ensure that the next person who designs a system like yours doesn't make the same mistakes and takes advantage of some of your best solutions. So make sure that the hard problems (and their solutions) are discussed and the non-obvious mistakes (and how to avoid them) are discussed.
- (d) A performance evaluation: obtained through analyses, simulation or measurements; Please state your technical result (one of the four types of technical results above) in your paper.

We will usually expect a minimum of 25 references primarily to journal papers, depending on the length of the paper (number of minimum references = $2n+10$, n =page length). Citations of textbooks should be used very rarely and citations to web pages should be avoided. All cited papers should be referenced within the text of the manuscript.

For REVIEW PAPERS, the paper should present a critical and constructive analysis of existing published literature in a field, through summary, classification, analysis and comparison. The function and goal of the review paper is:

- 1) to organize literature;
- 2) to evaluate literature;
- 3) to identify patterns and trends in the literature;
- 4) to synthesize literature; or
- 5) to identify research gaps and recommend new research areas.

The structure of a review paper includes:

1. Title – in this case does not indicate that it is a review article.
2. Abstract – includes a description of subjects covered.
3. Introduction includes a description of context (paragraph 1-3), motivation for review (paragraph 4, sentence 1) and defines the focus (paragraph 4, sentences 2-3)
4. Body – structured by headings and subheadings
5. Conclusion – states the implications of the findings and an identifies possible new research fields
6. References ("Literature Review") – organised by number in the order they were cited in

the text.

Number of minimum references for review paper is 50 references (included minimum 40 recently journal articles).

Please submit your revised paper in MS Word file format (or LATEX source files; ZIP your files if you present your paper in LaTeX), refer materials at: <https://bit.ly/35R6JTs> and <https://bit.ly/2DxU9MI> for further guidelines, and submit revised paper within 8 weeks through our online system at same ID number (NOT as new submission) on Tab "Review" as "Author Version" file.

Then, your revised paper will be judged for final decision of acceptance or rejection.

I look forward for hearing from you

Thank you

Best Regards,
T. Sutikno
Editor, IJEECS
ijeecs.iaes@gmail.com

Update your metadata in our online system as per your revised paper:

- Authors name are presented without salutation
 - Authors Name are presented Title Case (ex: Michael Lankan, NOT --> michael lankan, NOT --> MICHAEL LANKAN). Add all authors of your paper
 - Title of paper (ex: Application of space vector , NOT --> APPLICATION OF SPACE VECTOR)
 - Abstract
-

In preparing your revised paper, you should also pay attention to:

1. ABSTRACT

Prepare your abstract in single paragraph and within 200 words (and min 150 words in length). You need to summarize your contribution, idea, findings/results, and describe implications of the findings. Without abbreviations, footnotes, or references. Without mathematical equations, diagram or tabular material. It is suggested to present your abstract included the elements: 1) state the primary objective of the paper; 2) highlight the merits (or contribution; 3) give a conceptual idea on the method; 4) describe the research design and procedures/processes employed (is it simulation, experimental, survey etc.); 5) give the main outcomes or results, and the conclusions that might be drawn; and 6) include any implications for further research or application/practice, if any.

2. Introduction section

Explain the context of the study and state the precise objective

An Introduction should contain the following three parts:

- Background: Authors have to make clear what the context is. Ideally, authors should give an idea of the state-of-the art of the field the report is about.

- The Problem: If there was no problem, there would be no reason for writing a manuscript, and definitely no reason for reading it.

So, please tell readers why they should proceed reading. Experience shows that for this part a few lines are often sufficient.

- The Proposed Solution: Now and only now! - authors may outline the contribution of the manuscript. Here authors have to make sure readers point out what are the novel aspects of authors work. Authors should place the paper in proper context by citing relevant papers. At least, 8 references (recently journal articles) are cited to support this section.

3. Results and Discussion

The presentation of results should be simple and straightforward in style. This section reports the most important findings, including results analyses as appropriate and comparisons to other research results. This section should be supported suitable references.

4. Conclusion

Your conclusion should make your readers glad they read your paper. Summarize sentences the primary outcomes of the study in a paragraph (NOT in numbering).

5. References and Citations

In the IAES referencing style, a number [X] is inserted at the point in your writing where you cite another author's work. At the end of your work, the full reference [X] of the work is provided. Citations and their corresponding references are provided in the order they appear throughout your writing. IAES in-text citations consist of numbers provided in square brackets, which correspond to the appropriate sources in the reference list at the end of the paper. The in-text citations numbers start at [1] and continue in ascending order throughout the paper – unless you are referring to a source you have already cited in your text, in which case you can use the previously assigned number.

6. To enrich your references and improve your paper, we suggest your paper is integrated

Dania Eridani <danial@ce.undip.ac.id>

Final Paper ID# 1570687986 and Payment Receipt?

- PLEASE IGNORE this email if you have submitted:
 - 1. Final camera ready paper
 - Template: <http://iaescore.com/gfa/ijeecs.docx> or <http://iaescore.com/gfa/ijeecs.rar> (for LaTeX)
 - 2. Payment receipt
 - 3. Similarity checking report by iThenticate or Turnitin software

 - Please strictly use & adhere to the above template manuscript to avoid delays
 - Similarity score of your final manuscript must be less than 25% (current similarity score is %)
 - Original research paper: Min number of references is 25 sources (included min 20 recent journal articles).
 - Review paper: Min number of references is 50 sources (included min 40 recent journal articles).

- =====

Dear Prof/Dr/Mr/Mrs: Dania Eridani, Eko Didik Widiyanto, Ike Pertiwi, Wildan Bawono and Nadia Gunarto,

Congratulations!! Your paper entitled "Internet of Things based Attendance System Design and Development in a Smart Classroom", ID# 1570687986, authors: Dania Eridani, Eko Didik Widiyanto, Ike Pertiwi, Wildan Bawono and Nadia Gunarto for Indonesian Journal of Electrical Engineering and Computer Science has been ACCEPTED and will be published for forthcoming issue. The Indonesian Journal of Electrical Engineering and Computer Science (p-ISSN: 2502-4752, e-ISSN: 2502-4760) is a monthly peer reviewed International Journal in English, indexed by Scopus (CiteScore 2019: 1.4, SNIP 2019: 0.649, SJR 2019: 0.21, Q3 on Electrical and Electronic Engineering, Q3 on Computer Networks and Communications, Q3 on Hardware and Architecture, Q3 on Signal Processing, and Q3 on Control and Optimization), EI (INSPEC, IET), Google Scholar Metrics, ProQuest, EBSCO, BASE, OALib, SHERPA/RoMEO etc. The aim of this journal is to publish high-quality articles dedicated to all aspects of the latest outstanding developments in the field of electrical engineering. Its scope encompasses the applications of Telecommunication and Information Technology, Applied Computing and Computer, Instrumentation and Control, Electrical (Power), and Electronics Engineering.

For your information, according to international regulations, similarity score of camera-ready paper should be less than 25% (current similarity score is %). Single author is NOT allowed. The Editor(s) will check whether the final version has been performed and already address the reviewers' comments or not. Failing to do proper revision may lead to the rejection of your paper.

Please submit your final camera ready paper, similarity checking report (by iThenticate or Turnitin software) along with your payment receipt to: ijeecs.iaes@gmail.com within 4 weeks.

I look forward for your response

Sincerely yours,
Assoc. Prof. Dr. Tole Sutikno
Editor-in-Chief,

Online paper submission: <https://edas.info/N27804>

Below is the reviews on your papers:

=====
Review 1
=====

> *** Novelty and Contribution: Rate the degree of scientific contribution provided by this paper. Do the authors offer new findings? Do they give proper explanation and detailed analysis?

Borderline Accept (5)

> *** Paper Presentation: What is your evaluation on the quality of presentation from this paper (e.g. figures, tables, formats, etc.)?

Accept (9)

> *** Detailed Comments: Please provide detailed comments that will be helpful to the TPC for assessing the paper. Also provide feedback to the authors.

The paper is contribution is low in compare to the quality of the journal.

> *** Recommendation: Your overall rating.

Weak Accept (7)

=====
Review 2
=====

> *** Novelty and Contribution: Rate the degree of scientific contribution provided by this paper. Do the authors offer new findings? Do they give proper explanation and detailed analysis?

Weak Reject (3)

> *** Paper Presentation: What is your evaluation on the quality of presentation from this paper (e.g. figures, tables, formats, etc.)?

Borderline Accept (5)

> *** Detailed Comments: Please provide detailed comments that will be helpful to the TPC for assessing the paper. Also provide feedback to the authors.

1. There is not much novelty in this work. It is merely implementation of a well-studied concept.
2. The literature review is very brief.
3. Figures are very unclear.
4. A list of components and their cost should be provided.
5. Flowchart and pseudocode of the software part of the work needs to be presented.

> *** Recommendation: Your overall rating.

Weak Reject (3)

=====
Review 3
=====

> *** Novelty and Contribution: Rate the degree of scientific contribution provided by this paper. Do the authors offer new findings? Do they give proper explanation and detailed analysis?

Strong Accept (Excellent) (10)

> *** Detailed Comments: Please provide detailed comments that will be helpful to the TPC for assessing the paper. Also provide feedback to the authors.

ABSTRACT

OK - Clear and concise

INTRODUCTION

"Every place such as office, campus, school, et al." et al just for authors. Use "etc." or "others" instead.

"facing technology [6], et all." why the et all?

Major grammatical errors noted. This paper should be sent for proofreading before publication.

PROPOSED ATTENDANCE SYSTEM

Consider changing the title of this section to "System Design and Development" as this is a major step in SE and shouldnt be omitted in the paper.

"The process itself showed as the Finite State Machine" - VERY GOOD

RESULTS AND ANALYSIS

"The unit testing is done to check the technical function of each component before integrated into one system" - so it is not unit testing, it is actually COMPONENT TESTING. Unit testing is something else. What is presented is best elaborated as component testing.

3.5 Integration Testing - Consider changing it to SYSTEM TESTING, which is the final part of development testing in SE instead of integration testing.

CONCLUSION

Good

REFERENCES

Good, recent publications (2020) are included.

OVERALL: A very good INNOVATION paper. Authors should seriously think of proofreading the article before publishing as too many grammatical errors are noted.

> *** Recommendation: Your overall rating.
Strong Accept (10)

=====
Review 4
=====

> *** Novelty and Contribution: Rate the degree of scientific contribution provided by this paper. Do the authors offer new findings? Do they give proper explanation and detailed analysis?
Weak Accept (7)

Weak Reject (3)

> *** Detailed Comments: Please provide detailed comments that will be helpful to the TPC for assessing the paper. Also provide feedback to the authors.

This paper proposed an attendance system in smart classroom. The attendance system with the IoT concept in this research was successfully tested and integrated with the security and the classroom management system. The test sounds feasible. But the English writing is poor.

> *** Recommendation: Your overall rating.
Weak Reject (3)

The paper presents a methodology of smart classroom attendance system using IoT devices. The methodology is well-explained along with figures.

> *** Recommendation: Your overall rating.
Strong Accept (10)

Please pay an attention to double check your final camera ready paper:

(1) TEMPLATE, Please Strictly use and follow to the template Manuscripts (Word Format): <http://iaescore.com/gfa/ijeeecs.docx> or <http://iaescore.com/gfa/ijeeecs.rar> (LaTeX format). If you use LaTeX, submit your LaTeX source files to ijeeecs.iaes@gmail.com

For original research paper:

(2) Authors are suggested to present their articles with IMRaD sections structure (outline): Introduction - The Proposed Method/Algorithm/Procedure specifically designed (optional) - Research Method - Results and Discussion - Conclusion. Authors may present complex proofs of theorems or non-obvious proofs of correctness of algorithms after introduction section (obvious theorems & straightforward proofs of existing theorems are NOT needed).

(3) Introduction section: explain the context of the study and state the precise objective. An Introduction should contain the following three (3) elements:

- Background: Authors have to make clear what the context is. Ideally, authors should give an idea of the state-of-the-art of the field the report is about.
- The Problem: If there was no problem, there would be no reason for writing a manuscript, and definitely no reason for reading it. So, please tell readers why they should proceed reading. Experience shows that for this part a few lines are often sufficient.
- The Proposed Solution: Now and only now! - authors may outline the contribution of the manuscript. Here authors have to make sure readers point out what are the novel aspects of authors work. Authors should place the paper in proper context by citing relevant papers. At least, 5 references (recently journal articles) are cited to support this section.

(4) Method section: the presentation of the experimental methods should be clear and complete in every detail facilitating reproducibility by other scientists.

(5) Results and discussion section: The presentation of results should be simple and straightforward in style. This section report the most important findings, including results of statistical analyses as appropriate and comparisons to other research results. This is where the author(s) should explain in words what he/she/they discovered in the research.

(6) (URGENT)!!! About Figures & Tables in your manuscript:

- Because tables and figures supplement the text, all tables and figures should be REFERENCED in the text. Authors MUST EXPLAIN what the reader should look for when using the table or figure. Focus only on the important point the reader should draw from them, and leave the details for the reader to examine on her own.
- Tables are to be presented with single horizontal line under: the table caption, the column headings and at the end of the table. All tables are produced by creating tables in MS Word. Captured tables are NOT allowed.
- All figures MUST in high quality images

(7) Conclusion section: Summarize sentences the primary outcomes of the study in a paragraph. Are the claims in this section supported by the results, do they seem reasonable? Have the authors indicated how the results relate to expectations and to earlier research? Does the article support or contradict previous theories? Does the conclusion explain how the research has moved the body of scientific knowledge forward?

(8) Each citation should be written in the order of appearance in the text in square brackets. For example, the first citation [1], the second citation [2], and the third and fourth citations [3,4]. When citing multiple sources at once, the preferred method is to list each number separately, in its own brackets, using a comma or dash between numbers, as such: [1], [3], [5] or [4-8]. It is not necessary to mention an author's name, pages used, or date of publication in the in-text citation. Instead, refer to the source with a number in a square bracket, e.g. [9], that will then correspond to the full citation in your reference list. Examples of in-text citations:

This theory was first put forward in 1970 [9]."

Sutikno [10] has argued that...

Several recent studies [7], [9], [11-15] have suggested that....

...end of the line for my research [16].

(9) Please ensure the maximum page of your final paper is 8-page, but still allowed up to 14 pages (required to pay an extra fee).

Dear.IJEECS Editor,

We hereby attach the requested files for our manuscript ID# 1570687986. entitled "Internet of Things based Attendance System Design and Development in a Smart Classroom":

1. Final camera-ready paper
2. Similarity checking report by Turnitin
3. Payment evidence

We apologize for our ignorance because we actually sent the files to our edas.info account on April 6, 2021.

Thank you for your attention and cooperation.
