Dear Kurniawan Teguh Martono

It is my Pleasure to inform you that the review of your paper ID 34075-JATIT entitled AUGMENTED REALITY – BASED SHOOTING SIMULATOR SYSTEM USING UNITY 3D finally done.

The enclosed manuscript is under consideration for the above-mentioned journal. Please provide comment on the following criteria. Please be advised that you should provide comments within a month of receiving the manuscript. Reviews should be returned to editorJATIT@gmail.com / editor@JATIT.org as an attached file.

Reviewer :

1. Title can be improved. It should reflect research contribution.
2. Abstract should provide adequate information about research contribution.
3. Contextualizing the problem and significance of the outcomes should be the focus of introduction. What is the research issue that is being handled? List down exact research question(s) this work answers in order of priority. These objectives set shall guide the rest of the discussions in the paper.
4. Justify issues like what are the requirements for the simulator being presented? Why was unity gaming engine selected as the tool of choice? How will this simulator differ from similar presented before it? Or what makes this work unique? What are challenges associated with problems identified? What it will contribute to current literature on the topic should be the focus of literature critique. Cite more up to date work as literature connection is not convincing
5. Add a section of difference from prior work before conclusion where the authors should reflect on the discussion of literature critique in light of results achieved. Discuss strengths and limitations of your work after results analysis
6. Figure visibility of figure 8 and 12 should be improved. Color scheme used in figures should be consistent

If you have any questions, please contact me. Thank you for considering this journal as a venue for your work
