**Review Comments:** In this paper conducted using six variations of the catamaran hullform, namely symmetrical hull, asymmetrical straight inside hull, asymmetrical straight outside hull, which is each model has round bilge and hard chine variation. The study aims to find the lowest total resistance value. The hullform with lowest total resistance will be revaried to 3(three) different types of fishing gear, namely cantrang, purse seine, and bottom longline for stability analysis. **Analytical study. Paper Accepted for publication in IJMET.**
