Dear Dr. Suherman

EVALUATION PERFORMANCE OF PNEUMATIC DRYER FOR CASSAVA STARCH

Thank you for submitting the above paper to REAKTOR. Your manuscript needs revisions.

The reviewers comments are included below for your attention. Please carefully address the issues raised in the comments. I invite you to submit your revised manuscript.

The due date for submitting your revised manuscript is March 5, 2019

I look forward to receiving your revised manuscript.

Yours sincerely,

REAKTOR Editorial Team

Review

Reviewer B 29-11-2018 08:38 AM For author and editor	<u>Subject: EVALUATION PERFORMANCE OF PNEUMATIC DRYER FOR CASSAVA STARCH</u> A number of points below should be provided and elaborated in the manuscript: Abstract should be revised significantly for example: “Tapioca flour in small and medium industries is dried by a conventional method with dried under the sun.” Methodology no clear, how to sample and measure the moisture each time from the section of the duct? How to measure Residence time in each duct? How to sample and measure of water content of solid in each section in the duct during period of drying? Wet and bulb temperature were measured? Humidity of inlet drying air? Any calculation of heat loss during drying? Exergy calculation, Better to study the effect of operating condition during drying Please provide Drying rate of tapioca for all drying air variation. Any effect of drying towards quality of tapioca starch ? (why table test criteria shown?) What authors means of Feasibility test for table 1?
