**Author: D Chrismianto, AWB Santosa and A Wirahutama**

**Paper Title: Analysis Of Leading Edge Protuberances On Fully Submerged Hydrofoil Of 15 Meters Pilot Boat**

**Dear Authors,**

Congratulations on the acceptance of your abstract in ISOCEEN 2020. And thank you for your interest in this great Seminar. On behalf of the Conference Committee, I would like to formally invite you to present your paper in the 8<sup>th</sup> International Seminar on Ocean and Coastal Engineering, Environment and Natural Disaster Management (ISOCEEN 2020).

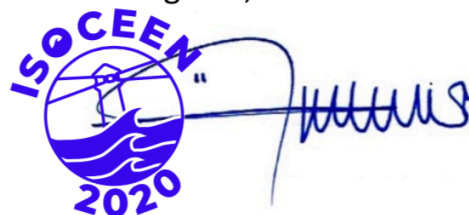

ISOCEEN 2020 aims at providing discussion forum countries to exchange their knowledge of research and development for researchers and experts in the field of Ocean, Offshore, Coastal engineering, environmental and Disaster Management. Before presenting your paper in the Seminar, you should complete your full paper and submit it as the schedule appeared in website (<http://isoceen.its.ac.id/important-dates/>).

We will inform anything about ISOCEEN process by e-mail. So make sure that you always check your email. After the seminar, the full paper will be reviewed to be aligned with the requirements published in The IOP Conference Series: Earth and Environmental Science (ESS) indexed in SCOPUS. The template for full paper can be downloaded through the guidance for authors (<http://isoceen.its.ac.id/wp-content/uploads/IOP-Template-ISOCEEN-2020.docx>).

We look forward to meet you online on 27-28 October 2020.

Thank you for your participation in ISOCEEN 2020.

Best Regards,

**SUNTOYO, ST., M.Eng., Ph.D**  
**Chairman of ISOCEEN 2020**

This document contains some comments on paper entitled: **Analysis of Leading Edge Protuberances on Fully Submerged Hydrofoil of 15 m Pilot Boat**

#### **SECTION I: Comments per Section of Manuscript**

General comment:	<p>Overall, the research results are insightful for understanding the hydrodynamic performances of different leading shapes on fully submerged boats. The analyses made are comprehensive, which highlights the objective point.</p> <p>However, before explaining the results, the basic theory of the numerical model should be included. Furtherly, the validation of numerical model results should also be explained.</p> <p>Grammar errors are found in the paper. Please use a grammar checker or other grammar services.</p>
Introduction:	<p>The introduction part has mentioned the literature background regarding previous research or study, emphasizing the importance of current research. The aims of the study are stated clearly.</p>
Methodology:	<p>The theoretical base of the numerical model should be included.</p>
Results:	<p>The results are carefully presented with suitable illustrations. The illustration makes the reader easy to follow what the author suggests.</p> <p>However, the validation of the numerical results should be explained.</p> <p>The quality of some figures also needs to be improved.</p>
Discussion:	<p>In the discussion section, the author mention “..<i>equation (2) and (3)</i>..” which do not exist in the text.</p>

Bibliography/References:	<ol style="list-style-type: none"> <li>1. The bibliography style does not meet the paper template requirement.</li> <li>2. Most of the references are outdated, which are more than five years ago.</li> <li>3.
