About this book

The purpose of this book is to provide a model that speaks specifically to adopting Information Technology Governance (ITG) and University Governance processes. Utilizing numerous studies, investigations and research on IT and University Governance and adapting previous and future proposed models for the current pandemic, the book speaks specifically to adopting effective ITG and University Governance processes. The book comprises a number of chapters contributed by leading international authors which analyze all aspects of IT and University Governance in relation to their impact on strategies in Finance, Sustainability, Academic, Research, Students and Faculty, Leadership, Campus, Employment and Recruitment, Quality Assurance, External and Industrial Relations, Internationalization, Transformation, and Board and Scholarship. Findings from the research conducted by these leading authors provide solutions

for higher education institutions in planning and allocating IT resources, managing the ownership of IT and other business projects while developing strategic committees and providing appropriate governance within the context of institutional objectives.
