SCOPE

Local Environment: The International Journal of Justice and Sustainability is a refereed journal written by and for researchers, activists, non-governmental organisations, students, teachers, policy makers and practitioners. Our focus is specifically on sustainability planning, policy and politics in relation to theoretical, conceptual and empirical studies at the nexus of equity, justice and the local environment. It is an inclusive forum for diverse constituencies and perspectives to engage in a critical examination, evaluation and discussion of the environmental, social and economic policies, processes and strategies which will be needed in movement towards social justice and sustainability - "Just Sustainabilities" - at local, regional, national and global scales. Please note that we only accept submissions that share our focus. Based on critical research and practical experience, we are particularly seeking submissions from nations and continents representing different levels of income and industrial development and from countries in transition in order to engage in mutual learning and understanding.
