i. Terindeks : Google Scholar

Kategori Publikasi Jurnal Ilmiah : ☒ Seminar Internasional
(beri ✓ pada kategori yang tepat) ☐ Seminar Nasional

Hasil Penilaian *Peer Review* :

Komponen Yang Dinilai	Nilai Maksimal Seminar		Nilai Yang Diperoleh
	Internasional 15x40%= 6	Nasional	
a. Kelengkapan unsur isi prosiding (10%)	0,6		0,6
b. Ruang lingkup dan kedalaman pembahasan (30%)	1,8		1,8
c. Kecukupan dan kemutahiran data/informasi dan metodologi (30%)	1,8		1,5
d. Kelengkapan unsur dan kualitas penerbit (30%)	1,8		1,5
Total = (100%)	6		5,4

Catatan penilaian oleh Reviewer :

a. Kelengkapan unsur isi prosiding	: Abstrak sudah terstruktur dengan baik. Pendahuluan – Metode- Hasil-Diskusi & Referensi sudah lengkap
b. Ruang lingkup dan kedalaman pembahasan	: Merupakan studi literature review yang dilaksanakan dengan baik. Pembahasan hasil studi diskusikan cukup dalam dan luas.
c. Kecukupan dan kemutahiran data/informasi dan metodologi	: Metode sampling dengan menggunakan teknik search literature review yang baik. Data diolah dan disajikan dengan baik
d. Kelengkapan unsur dan kualitas penerbit	: Penerbit seminar terdiri dari ahli-ahli dalam scope nasional. Unsur penerbit sudah lengkap

Holistic Nursing Practice: Art, Science, or Evidence?

3rd Java International Nursing Conference

Associate Professor, Dr Jennieffer Barr
Deputy Dean of Research
Central Queensland University Australia

BE WHAT YOU WANT TO BE
cqu.edu.au

Presentation Outline

Introduction

The lessons I have learnt

Considering what is the art of holistic nursing

Do all nurses practice holistic nursing: What does the research say?

Considering the hierarchy of evidence for holistic nursing practice

Looking at research from all paradigms to inform holistic nursing practice

Conclusion

References

ENHANCING NURSES EXPERIENCE IN COLLABORATION WITH THE PHYSICIANS IN THE EMERGENCY ROOM

Hery Wibowo¹, Retty Ratnawati², Dian Susmarini³, Indah Winarni⁴, Kumboyono⁵

¹Master Program In Nursing Specialization Emergency Faculty of Medicine Brawijaya
University, Emergency Departement Balangan Hospital South Kalimantan

^{2, 3, 5} Master Program In Nursing Faculty of Medicine Brawijaya University

⁴Faculty of Culture Studies Brawijaya University

ABSTRACT

Background: *Physician and nurse were two professions most often associated with the emergency. A harmonious relationship between them could advance well collaboration in emergency room. It was obvious that a good collaboration could improve the healing of patients. However, nurses experience in building well collaboration with physicians was deeply necessary to require.*

Purpose: *The aim of this research was necessarily to explore the nurses comprehension on their experience in collaborating with the doctors in the emergency room.*

Method: *This research was advanced by using qualitative method with interpretive phenomenology approach. The number of respondents in this study was ten nurses labored in emergency room and was analyzed with Miles and Huberman.*

Results: *The results of this research were to obtaine eight themes namely the perceptions of nurses as physician subordinate, collaboration process, final decision determiner, against toward nurses status as physicians staffs, empathy in expecting the healing of patients, collaboration advocacy, collaboration obstacles, expectation to improve competence, self-esteem and admission as a nurse.*

Conclusions: *This experience could be basic education to furnish communication expertise to the physician and self skill equipment in the field of emergency and many other collaboration competences by practicing and interprofessional education. Some findings from the investigation of some respondents provided support for educational initiatives aimed to develop the collaboration practice of nurse-doctor within health care professionals at the emergency room in order to strengthen more collaboration among health care teams.*

Keywords: *collaboration, nurse, experience, physician*

BACKGROUND

The rising numbers of patients treated through the emergency department make a form of service require a collaboration of emergency team members. By the times the the more number of patients, the more interprofessional collaboration needs as a member of an emergency team require.^{1,4} Deficiency in

THE LIVED EXPERIENCES OF FACULTY CARING BY THE NURSING FACULTY AND STUDENTS IN A PROBLEM BASED LEARNING ENVIRONMENT AT ST PAUL UNIVERSITY PHILIPPINES

Ma.Elizabeth C. Baua, RN, MSN, DNS
St. Paul University Philippines

ABSTRACT

Background: *Developing faculty caring behaviors in the academic setting is a challenging experience for both faculty & students. In order to recognize the significant implications of a learning experience grounded from a caring framework, the nursing faculty and students must have a clear grasp on how caring transpires within tutorial sessions in the study of nursing using problem based learning pedagogy.*

Objective: *The purpose of the study was to uncover the lived experiences of faculty caring between faculty and students during problem based learning tutorial sessions. Examining lived experiences of faculty caring in a problem-based learning environment provided perspectives that can be lived and valued by nursing as a discipline and profession. Knowledge of nursing based on lived experiences of faculty caring provided a more effective problem-based learning praxis.*

Methods : *Using Van Manen's (1990) hermeneutic phenomenology lived experiences of faculty caring were revealed through analysis of interviews to answer the research question "what are the lived experiences of faculty caring between nursing faculty & students in a problem-based learning environment? The lived experience of faculty caring phenomenon has meaning for nursing faculty and nursing students as they utilize the PBL pedagogy but is not sufficiently studied in the discipline of nursing. This hermeneutic phenomenological qualitative study is designed to understand the lived experience of faculty caring within the context of the nursing faculty and nursing student relationship during PBL tutorial sessions. This approach provided knowledge base to gain deeper understanding of faculty caring that can be used to teaching learning nursing using PBL approach. Eighteen (18) full time tenured nursing faculty and forty (40) full time BSN nursing students participated in the study by means of in-depth interviews describing the meaning of faculty caring within a nursing faculty-nursing student relationship in PBL praxis.*

Results: *The uncovered lived meaning of faculty caring behaviors as a distinct phenomenon included seven caring themes that illuminated the experience. Roach's caring attributes and Jean Watson's Transpersonal Caring Relationship were used as framework to reflect upon the findings. Seven (7) caring themes emerged from the study: **presence, concern, commitment, competence, conscience and guidance.** Sub - themes from the seven caring themes were also known. "Showing compassion and giving advice" (guidance) were dominant faculty caring behaviors. "Being available, (presence) giving advice (guidance) and showing concern" were interpreted as important faculty caring behaviors according to nursing students that a nursing faculty should manifest during PBL tutorial sessions.*

CARING SCIENCE WITHIN ISLAMIC CONTEXTS; A LITERATURE REVIEW

ABSTRACT

Background: *Caring is an essence of nursing and many studies enlighten about caring for various populations and settings. Caring science within Islamic contexts has gained more attention from nurses, especially in the area related to cultural and spiritual care.*

Aim: *The aim of this study was to discuss about the concepts of caring science within Islamic contexts.*

Methods: *We extracted 27 articles in both qualitative and quantitative studies, in English language, based on PRISMA (Preferred Reporting Items for Systematic Reviews and Meta-analyses) method. The date and years were limited from January 2008 to 2014 from several databases. The keywords were 'caring science', 'Islamic caring', 'and Islamic Perspectives' and combined with words of 'Nursing', 'caring', and 'care'.*

Findings: *Six main topics have been include in this study: 1) theoretical definition of caring; 2) theories of caring and theory of caring in Islamic perspectives; 3) The differences of caring theories 4) the similarities of caring theories; 5) caring action in Islamic perspectives, and 6) caring outcomes.*

Conclusion: *In Islamic nursing, caring is based on well-being improvement and healing, and concentration on all domains of nursing care and relationship between different dimensions of human (bio-psycho-social-spiritual dimensions).*

Implications: *Within these contexts, a better understanding of the diverse conceptualizations of nursing is needed in order to ensure that nurses across all contexts can provide optimal care.*

Keywords: *Caring, Islamic contexts, Islamic caring.*

BACKGROUND

Islam for Muslims is not only a religion but a complete way of life that advocates peace, mercy and forgiveness. Muslims tend to emphasize the relationship between Allah and the person, without intermediaries (Akhtar, 2002). The fundamental teaching of Islam is the belief in the oneness of Allah (Rassool, 2000). Muslims live their lifetime through the belief in and practice of the faith for

Inter-professional collaboration in diabetes care in clinical settings
