Catatan Penilaian Artikel oleh Reviewer:

1. Tentang kelengkapan dan kesesuaian unsur:

Unsur-unsur pada artikel ini tergolong cukup dengan unsur artikel yaitu terdiri dari title, abstract, methodology, result, conclusion, dan reference namun tidak menampilkan discussions. Unsur-unsur ini belum secara keseluruhan memenuhi unsur-unsur yang alzimnya terdapat di sebuah artikel jurnal ilmiah karena bagian diskusi tidak ada. Lebih jauh, di dalam abstrak, belum tersaji informasi demografis subjek penelitian, seperti persentase jenis kelamin, rata-rata usia, dan SD usia.

2. Tentang ruang lingkup dan kedalaman pembahasan:

Artikel ini mencakup topik mengenai pengalaman siswa SD mengenai bullying. Di abstrak maupun di dalam artikel pada bagian pendahuluan, belum disebutkan secara spesifik cakupan pengalaman yang ingin digali, apakah sebagai pelaku, korban, atau bystander.

3. Kecukupan dan kemutakhiran data/informasi dan metodologi:

Artikel ini memuat 36 referensi dan lebih dari 80% merupakan terbitan 10 tahun terakhir. Research

methodology memuat partisipan, metode pengumpulan data dan analisis data. Meskipun demikian urgensi dan kebaruan penelitian belum dihighlight dalam pendahuluan atau pembahasan. Bagian diskusi tidak ada, sehingga hasil penelitian yang disajikan pada bagian Results tidak diikuti pembahasan secara komprehensif.

4. **Kelengkapan unsur kualitas penerbit:**

Artikel ini diterbitkan oleh *Hampstead Psychological Associates* dengan kualitas cukup memadai dan memiliki ISSN. Artikel ini termasuk jurnal internasional namun tidak memuat minimal 4 negara dalam 1 volume terbitan. Hasil cetak jurnal cukup jelas.

5. **Indikasi plagiasi:**

Orisinalitas artikel tergolong memadai, yang ditunjukkan dengan hasil Turnitin similarity indeks = 9%. Hal ini juga mengisyaratkan bahwa dalam artikel ini tidak terdapat indikasi plagiasi.

6. **Kesesuaian bidang ilmu:**

Artikel ini memuat topik mengenai bullying, yang sejalan dengan bidang ilmu pengusul, yaitu psikologi.

Journal Information

This peer reviewed Journal was created in 1996 by practitioners, mental health program managers and mental health consumers to provide international practitioners, scholars and consumers with a forum to publish and discuss their work in program development, evaluation research, policy innovations, and therapeutic practices that have been successful in their particular region and cultures. IJPR is not associated with any university or governmental institution, nor is it part of any 'old boy' or other professional network. It was created to provide information to an international readership about issues related to psychosocial rehabilitation and associated topics.

Articles on psychosocial interventions, psychopharmacotherapy, mental health primary care, institutional and community care innovations, decentralization, policy changes, community & regionally based systems, and program evaluation are given particular attention. However, all articles that relate to psychosocial rehabilitation will be considered.

We invite comment from all readers on any and all subjects published in this journal, including the journal format itself. Feel free to comment on the Bulletin Board as well.

The Student Religion/Pluralism/Media/ Survey A Comparison of German and Turkish Secular High School Students from Research to Practice

 **Benina F. Gould*** and **Jeffrey B. Gould**

Abstract

Purpose: The purpose of our research was to find out if high school students want more discussion and/or education about religion in their schools and to assess their tolerance to other religions. **Methods:** Two groups of secular high school students, German Non-Turkish and Turkish were asked questions about Religious identity, Pluralism, and Social Media. To assess religious tolerance, they were presented a picture of each religious symbol. **Results:** Our study identified that students wanted more information about religions and our findings suggest that to encourage Pluralism and Religious Tolerance it is important to develop curriculum that will introduce students to different religions and to develop training to facilitate teachers' educational interventions. **Implications:** Before one can build effective public policy for religious/pluralistic education, it is important to know more about young people and their religious belief systems. Because religion plays a significant role in history and society, pluralistic religious education is essential to understanding both the nation and the world.

Respect, Internal Attribution, and CORFing as Muslims” Cultural-psychological Strategies in Fostering Interreligious Harmony in Waingapu

👤 Aad Satria Permadi*, Rozmi Ismail and **Arena bt. Che Kasim**

Abstract

Purpose: To discover the psychological dynamics of the Muslims in fostering interreligious harmony in Waingapu. **Methodology:** This is qualitative-phenomenological study. The study included 11 participants who were selected using purposeful-snowball sampling. The researchers used eight main interview questions to guide data collection process. **Results:** Research result shows that in fostering interreligious harmony, they are applying respect and internal attribution, as well as performing CORFing. All three stemmed from the norms of Islamic creed (aqidah) and manners (akhlaq) and influenced by the belief of “one ancestor”. **Applications/Originality/Value:** The research resulted in an understanding that the norms of aqidah, which is commonly considered as dividing the community, turned out to be a catalyst of harmony between the Muslims and other religious groups in Waingapu. The narrative behind it shall be discussed in this article.

Influence of Videogames on Student Behavior **Ivonne Carolina Meneses Quimis, María Elena Moya Martínez and María Rodríguez Gámez****Abstract**

For a few decades, new technologies have evolved in such a way that the current generations since birth are impregnated with a different culture from earlier times, this seen from various environments. Visual and sensory development increases in these processes where it can be linked to brain development, if we compare it with other generations it shows how this learning process is faster. Bibliographic analysis from different dimensions has allowed us to know the link between the application of video games and the teaching-learning process, which is used as a teaching resource in the formation of new knowledge that contributes to the acquisition of information. The excessive handling of these virtual applications can cause health problems; such as sedentary lifestyle, anxiety, obesity, or physical malformations due to posture, thus altering the normal lifestyle of the video player and his family. Video games influence the behavior of children, depending on the social environment where they develop as they are the school, their family and their implicit characteristics of their personality, in this environment teachers and parents are responsible for controlling the use of children. Electronic devices and games according to their needs because they can cause disorders in different scenarios, due to lack of control or emotional problems.
