Catatan Penilaian artikel oleh Reviewer:

- Kelengkapan unsur artikel: sesuai dengan "Author Guidelines" (Title, Introduction, Literature Review, Methodology Results and Discussion, Conclusion, Acknowledgement, References). Substansi artikel sesuai bidang ilmu pengusul/penulis anggota (Ilmu Sejarah dan teori Arsitektur). Ada kebaruan tentang ilmu sejarah dan teori arsitektur yang dikaitkan dengan permasalahan konservasi bangunan dan pedagang.
- Ruang lingkup dan kedalaman bahasan: Substansi artikel sesuai dengan ruang lingkup jurnal (Asian Journal of Environment-Behaviour Studies (ajE-Bs)). Kedalaman pembahasan cukup baik (38 buah rujukannya dilibatkan dalam proses membahas hasil).
- Kecukupan/kemutakhiran data dan metodologi: Data-data hasil penelitian telah menunjukkan ada kebaruan informasi/ metodologi. Dari 38 buah rujukannya, terdapat 6 buah literatur terkait aspek sejarah sehingga menggunakan literatur lama yang lebih dari 10 tahun terakhir karena terkait dengan sejarah, kemutakhiran informasi tergolong cukup. Metode sejarah dengan menggunakan arsip berupa peta dan foto kuno cukup lengkap.
- Kelengkapan unsur dan kualitas terbitan/jurnal: Jurnal ini tergolong jurnal internasional tidak terindeks di scopus melainkan hanya terindeks pada google scholar, E-ISSN: 2514-751X; Penerbitnya tergolong terjamin yaitu e-IPH Ltd UK
- Indikasi plagiasi: Plagiasi terindikasi sebanyak 6%.
- Kesesuaian bidang ilmu: sesuai dengan keilmuan penulis yaitu tentang perancangan arsitektur dan sejarah arsitektur.

Catatan Penilaian artikel oleh Reviewer:

- Kelengkapan unsur artikel:
Manuskrip ditulis sesuai dengan panduan atau template jurnal. Metode penelitian dideskripsikan secara singkat dan menjelaskan langkah-langkah penelitian sejarah dengan dikomparasikan pada kondisi di masa kini. Ada bukti korespondensi dengan tim editor.
- Ruang lingkup dan kedalaman bahasan:
Artikel mendiskusikan tentang konsep konservasi bangunan tahap1 hingga belum semua pedagang terakomodir dalam bangunan. Rekomendasi penelitian cukup baik karena memberikan solusi bagi *planner* dan pemerintah untuk memfungsikan dengan metode *adaptive reuse* yaitu menampung pedagang dengan tema khusus untuk mengisi tahapan pembangunan yang telah selesai.
- Kecukupan/kemutakhiran data dan metodologi: Metode penelitian dideskripsikan secara singkat dengan menjelaskan langkah-langkah informasi kesejarahan bangunan. Metode sejarah dari penggalian arsip-arsip kuno, peta dan foto kuno diperoleh dari Museum Belanda.
- Kelengkapan unsur dan kualitas terbitan/jurnal: Jurnal merupakan jurnal internasional namun hanya terindex google scholar; Penerbitnya tergolong terjamin yaitu e-IPH Ltd UK.
- Indikasi plagiasi: Tidak ada unsur plagiasi, index similarity 6%
- Kesesuaian bidang ilmu: topik yang dibahas berkaitan dengan kepakaran pengusul dengan topik dalam jurnal yaitu bidang teori dan sejarah serta perancangan arsitektur.

The Conservation of Old Johar Market Building

RS Rukayah, AB Sardjono, M Abdullah... - Asian Journal of ..., 2020 - aje-bs.e-iph.co.uk

The conservation efforts for heritage architecture are currently trending. This paper aims to uncover the conservation of traditional markets after experiencing a fire in the Johar market, Semarang, Central Java, Indonesia. After the market was renovated, it turned out that it had not included all traders in it. Using the historical method, there is revealing that the number of traders exceeds the room's capacity. Theory discusses about the conservation approach and applied adaptive reuse theory found that the initial plan, is possible to return its function ...

Abstract

The outdoor play setting is often ignored as a viable place to accommodate children with disabilities, limiting or completely excluding them from playing like other ordinary children. Thus, this study aims to determine the integration of Universal Design (UD) qualities and the applicability of Malaysian Standard (MS 966; 2017) in Malaysia's public playground. The physical site observation process has been conducted at three (3) public playgrounds for children with disabilities in Malaysia. The findings showed that there are 8 components of the UD principle, and MS966:2017 has been violated in the playground design.

Keywords: Universal Design, Public Playground, Children with disabilities.

Abstract

The propagation of household recycling is undeniable and thorough. Recycling behaviour among households in urban areas and Malaysia has, however, received less attention. Therefore, the purpose of this preliminary study is to outline the influence that household behaviour is motivated through waste recycling. The survey carried out in six (6) suburbs of Shah Alam using a convenient sampling method to perform a site inventory and questionnaire survey. The findings are affected by the influences of recycling and individual activities representing their contribution to recycling domestic waste.

Keywords: Human Behaviour; Domestic Waste Recycling; Waste Generation; Urban Households.

Abstract

The public space plays a crucial role in providing adequate infrastructure for vulnerable social groups in the context of high-density urban Asia. In this study, a well-known elevated pedestrian network in Hong Kong emerges as a revelatory case for the comparative analysis of the pattern of stationary uses before and after the COVID-19 pandemic out-break. Findings reveal a significant decrease (-20 %) in the total number of users and a shift in the pattern of activities, comprising a significant shrinkage of socially oriented uses and a vast increase of individual behaviors. This study advocates a responsive policymaking that considers the peculiar post-outbreak needs of migrant workers in Hong Kong and in high-density urban Asia

Keywords: Covid-19; public space; migrant domestic workers; behavioural mapping
