Hasil Penilaian *Peer Review* :

Komponen Yang Dinilai	Nilai Maksimal Prosiding		Nilai Yang Diperoleh .....
	Internasional <input type="checkbox"/>	Nasional <input checked="" type="checkbox"/>	
a. Kelengkapan unsur isi prosiding (10%)		1	1
b. Ruang lingkup dan kedalaman pembahasan (30%)		3	2,5
c. Kecukupan dan kemutakhiran data/informasi dan metodologi (30%)		3	2,5
d. Kelengkapan unsur dan kualitas penerbit (30%)		3	3
<b>Total = (100%)</b>		<b>10</b>	<b>9</b>
<b>Nilai Pengusul = 40% x 9 = 3,6</b>			

Catatan Penilaian prosiding Oleh Reviewer :

- a. Kelengkapan unsur isi prosiding : Unsur artikel lengkap. Terdapat abstrak, pendahuluan, metode penelitian, isi, simpulan, dan referensi. Persoalan dan usulan telah dibahas jelas dalam artikel.
- b. Ruang lingkup dan kedalaman pembahasan: Pembahasan mendalam. Persoalan, usulan, dan argumentasi disampaikan secara runtut serta terperinci. Berbagai norma hukum terkait dikutip secara tepat, untuk menguatkan argumentasi. Persoalan pemilih pemula dan Pemilu 2019 sesuai dengan ruang lingkup dan bidang studi pengusul.
- c. Kecukupan dan kemutakhiran data/informasi dan metodologi: Sumber data lengkap dan mutakhir, terdapat artikel jurnal, buku, berita koran, dan sumber online. Semua data dikutip secara bertanggungjawab. Metode normatif dengan pendekatan perundang-undangan dan pendekatan konseptual telah diterapkan secara ajek.
- d. Kelengkapan unsur dan kualitas penerbit: Kualitas penerbit bagus. Memiliki reputasi untuk prosiding. Akuntabilitas jelas, tampak dari web page Penerbit.

## Beginner Voters' Participation in the 2019 Election in Semarang

[A Diamantina](#). LT ALW - 6th International Conference on ..., 2019 - atlantis-press.com

Beginner voters, consisting of millions of young people, are potential voters. They highly contributed to the victory of candidates in the 2019 simultaneous elections and helped to maintain robust and democratic governance. The level of participation of beginner voters in Semarang and its affecting factors are worthy of being studied. Therefore, this current study aims to examine this issue using a legislative and conceptual approach. Beginner voters seem to have unique characteristics and face external conditions that may affect their ...

### The Use of the Strict Liability Principle by the Indonesian Courts in Solving Environmental Conflicts

H. Achmad Romsan, Abunawar Basyeban, Moh. Idris

The inclusion of strict liability provision in the Indonesian EMAs has a long history. Since the enactment of the first EMA of 1982 up to the third EMA of 2009, there have been 45 community environmental disputes submitted to the District Court, but the Court verdicts have torn the sense of the people's...

**Abstract.** Beginner voters, consisting of millions of young people, are potential voters. They highly contributed to the victory of candidates in the 2019 simultaneous elections and helped to maintain robust and democratic governance. The level of participation of beginner voters in Semarang and its affecting factors are worthy of being studied. Therefore, this current study aims to examine this issue using a legislative and conceptual approach. Beginner voters seem to have unique characteristics and face external conditions that may affect their participation. Some of the conditions include unstable emotion and lack of political knowledge, which may influence their political preference. For instance, their political choice may be influenced by the popularity of candidates who are also their peers' idols. Likewise, administrative and political issues may influence the political participation of beginner voters. Thus, serious efforts need to be made to increase beginner voters' participation in general elections as a manifestation of the people's sovereignty.

have limited political experience and do not see politics as an integral part of all aspects of life, and are often referred to as beginner voters [1].

The number of beginner voters in the 2019 Election was quite significant, which was around 7.4% of the total 196.5 million voters, or approximately 14 million people [2]. With a large number of the beginner voters, encouraging the participation of beginner voters in the 2019 Election was essential for the success of the election. There are many things that promote the participation of beginner voters in the 2019 Election; the beginner voters are recorded in the final voter list, socialization and education on electoral affairs, exciting campaigns, and so forth. However, a month prior to the 2019 Election, some of these aspects were still problematic. Without making improvements, it is difficult to expect beginner voters to be enthusiastic about participating in the 2019 Election. This paper discusses the participation of beginner voters in the 2019 Election, especially in Semarang City and the factors influencing the participation of first-time voters.

# Scientific Reasoning Skills Among Arabic Secondary School Students and Its Relationship With Teaching Styles of Arabic Secondary School Brunei Darussalam Teachers

Noor Shah Saad  
Islamic Religious University College  
Brunei DS  
noorshah5156@gmail.com

Eng Tek Ong

University of Muhammadiyah Malang  
Indonesia

**Abstract.** This survey research aims to gauge the levels of students' scientific reasoning skills and teachers' teaching style at three Arabic secondary schools in Brunei Darussalam. The research design employed was that of a survey research. Using the stratified random sampling, a total of 60 students and 60 teachers were involved as the respondents of this study. Two research instruments were used for the data collection, namely the Scientific Reasoning Skills Test, and Teachers' Teaching Style Inventory. The data were analysed descriptively using the frequency, percentage and mean, and inferentially by means of a t-test and Pearson Moment Product Correlation. The findings indicated that there are generally three levels of scientific reasoning skills, of which 83.3% of the students achieved the Level 1 (concrete operational), 16.7% achieved the Level 2 (transition operational), and none of the students achieved the Level 3 (formal operational). Generally, the scientific reasoning skills of Year 10 students at the Arabic

constantly face new challenges. In preparation for addressing these challenges, the Ministry of Education is ceaselessly researching and refining the National Education System to ensure that it is always relevant at all times. The Brunei Darussalam Education Ministry is committed to providing an educational system that will prepare the younger generation for a future role as a capable, creative, intelligent and innovative people who will defend the social values embodied in the Malay Islamic Monarchy (MIB) concept. The phenomenon of globalization and digitalization in the 21st century has brought new challenges to education. Students must be equipped with knowledge and thinking skills so that they could give their critical and analytical views and opinions, make efficient judgments, produce quality works and inventions, solve problems effectively, shape

# The Internalization of Profane and Sacred in Forming the Character of Islamic *Santri* in the Islamic Boarding School of Zainul Hasan Genggong Probolinggo

Abd.Aziz  
Islamic Teacher Training Institute of Zainul Hasan Genggong  
Kraksaan, East Java

Imam Qalyubi  
The state Islamic Institute (IAIN) Palangka Raya  
Central Kalimantan  
imamqalyubi@yahoo.com

**Abstract.** This paper will describe the internalization of profane and sacred values in shaping the character of *santri* in the Zainul Hasan Genggong Islamic boarding school the regency Probolinggo. The internalization of the values of education has been more to the application of profane things such as how a student behaves when dealing directly with parents, teachers and leaders. But sacred behavior which is dealing to the respect to the people in-absentia. When other people tried to leave the sacred ritual to profane precisely in the Zainul Hasan Genggong Islamic boarding school in Probolinggo, the two concepts, profane and sacred, were coherently used especially in the internalisation of character education value systems. To explore the profane and sacred this paper use the theory which is proposed by Durkheim and Eliade.

In line with Durkheim, Mercia Eliade in his book *The Sacred and the Profane: The Nature of Religion* which was published in 1959 specifically addresses the two dichotomies more thoroughly. In his book Eliade portrays two fundamental views of an experience that is traditional and modern experience. Traditional humans, according to Eliade, see the world with an approach that is filled with sacredness, whereas modern humans tend to neutralize their views on the world. For modern society, the world is a profane reality [2].

In relation to this study, Islamic boarding schools as part of the social community also have a system that applies both in physical development such as facilities or infrastructure, on the other side the pondok also carry out non-physical construction of pesantren such as the formation of characters in *santri*. In the process of forming the character of Islamic *santri* in the Islamic boarding school of Zainul Hasan Genggong several
