Welcome Message

First of all, thanks to **God**, the most merciful, beneficent and compassionate, for His blessing that this conference could be held today.

I would like to express my greatest gratitude to Dr. dr. Ermita Isfandiary Ibrahim Ilyas, MS, AIFO; Chairperson of Indonesian Physiology Society and Dr.dr. Dwi Pudjonarko, M.Kes, Sp.S (K), Dean of Faculty of Medicine Diponegoro University, for all of their kind supervision during the preparation of this event. I would like to express my sincere gratitude to all of the committee members for all of your hard work, kind help, and best effort as a solid team work, by which this event can be held successfully today.

I would like to thank all of the honorable SIPSAM speakers for your willingness to come and give lectures here, and all of participants from various institutions in the world.

Welcome to **The 28th International Physiology Seminar and Annual Meeting of Indonesian Physiology Society (SIPSAM)**, It is a great pleasure to have all of you here in SIPSAM, Semarang Indonesia, on this July 12-13, 2019. We're excited about this two-day opportunity for leading scientists and clinicians from around the world to meet, present and collaborate.

SIPSAM in this year focuses on some highlight topics which are Neurophysiology; Exercise Physiology and Nutrition; Stem Cell and Regenerative Medicine; Teaching Physiology; Cardiovascular Physiology; Physiological Aspect in Elderly, Ergonomics, and Miscellaneous which have been of interest to hundreds researcher and clinician that want to share their interesting research problems.

As a major goal of this event, we hope that it can be an excellent chance to discuss interesting ideas and develop fruitful project in the future, network opportunities with old and new colleagues, coordination new partnerships which advance collaboration either about the research field or not, as well as the careers of all participants.

SIPSAM is held on Semarang, a fascinating city with rich history and tradition of Java. It is a beautiful city, located on Central of Java, near Borobudur temple; one of Wonders of the World.

Please enjoy your participation in SIPSAM and have a great experience during your stay in Semarang.

Wish you the best in all your work.

Yosef Purwoko, MD, M.Sc, Internist, Geriatrician

Organizing Chairperson

SIPSAM 2019

Welcome Message

Praise to the God Almighty for **The 28th International Physiology Seminar and Annual Meeting of Indonesian Physiology Society (SIPSAM) 2019** and I am very excited for this event and we welcome to all of the participants and speakers to this event. The special acknowledgement, I address to the distinguished speakers Prof. Gerard Pals, Ph.D From VU University Medical Center, Amsterdam - The Netherlands, Prof. Chia-Hua Kuo, Ph.D, FACSM From University of Taipei, Taiwan, Prof. Dr. Cheng Hwee Ming from University of Malaya, Malaysia, Mohd Farooq Shaikh, M.Pharm, Ph.D From Monash University, Malaysia, and all of the speakers. I am very grateful for your willingness to attend and share your knowledge to us.

I wish that this event will give a big contribution on sharing knowledge and information about physiology sciences for the academic members, researchers and all of the participants. I also would like to appreciate to all of the committee members for their effort and hard work so that this event can happen.

Once again, welcome to The 28th International Physiology Seminar and Annual Meeting of Indonesian Physiology Society (SIPSAM) 2019, I hope that all of you enjoy your stay at Semarang and we will see you again on the next event.

Ermita Isfandiary Ibrahim Ilyas, MD, MS, Ph.D, AIFO
Chairperson of Indonesia Physiological Society

Scientific Programme

THE 28th INTERNATIONAL PHYSIOLOGY SEMINAR
& ANNUAL MEETING OF INDONESIAN PHYSIOLOGY SOCIETY (SIPSAM)
GRASIA HOTEL SEMARANG, 12-13 JULY 2019

Jam	Day I (Friday, 12 July 2019)		
	Topic: Neurophysiology, Exercise Physiology & Nutrition, Stem Cell and Regenerative Medicine		
07.30 - 08.00	Registration and Coffee Break		
08.00 - 08.20	MC: Mohammad Arif Ali, S.Si., M.Sc and dr. Darmawati Ayu Indraswari, M.Si.Med Opening Speech (Organizing Chairperson, Indonesian Physiology Society Chairperson), sing "Indonesia Raya" and "Hymne IAIFI"		
08.20 - 08.40	Topic : Ethical Aspect on Animal and Human Resarch (dr. Djoko Widiyarto, JS, DHM, M.Kes)		
	Plenary Session Day 1 (Moderator : dr. Yuriz Bakhtiar, Ph.D, Sp.BS) :		
08.40 - 09.20	Prof.dr. Zainal Muttaqien, Ph.D, Sp.BS(K) : Learning and Developing Research in Neurophysiology from Epilepsy cases		
09.20 - 10.00	Prof. Chia-Hua Kuo, Ph.D : How Exercise and Protein Diet Impact Human Aging		
10.00 - 10.40	Prof. Gerard Pals, Ph.D : Stem Cells and Transdifferentiation		
10.40 - 11.00	Discussion		
11.00 - 11.30	Poster Presentation Session 1		
11.30 - 13.00	Jumah Prayer and Lunch		
	Invited Lectures		
	Grup I (Neuroscience and Renal Physiology)	Grup II (Exercise Physiology & Nutrition)	Grup III (Stem Cell and Regenerative Medicine)
	Moderator: dr. Darmawati Ayu I, M.Si.Med	Moderator: Dr. dr. Mahalul Azam, M.Kes	Moderator: dr. Ferdy KC, M.Si.Med, Ph.D

ABSTRACT

Introduction

Door-to-needle (DTN) time and the infarct type (i.e. lacunar vs territorial infarct) are two of critical factors that determine ischaemic stroke outcome. This study aim to observe the effect of DTN time and infarction type to the stroke outcome measured by NIHSS improvement.

Methods

This study is an analytic observational study using prospective cohort approach on acute ischemic stroke patients who got thrombolytic therapy at Dr. Kariadi Hospital from January 2018 to May 2018. The difference of the baseline and discharge NIHSS score were examined. The DTN time was documented as 40, 45, 50, 55, and 60 minute. The infarct type was documented as lacunar or territorial infarct. The data tested using Two-Way ANOVA, and post hoc study.

Results

The total of 30 patients had DTN time as follow: 4 (13.3%) were 60 minute, 3 (10%) were 55 minute, 7 (23.3%) were 50 minute, 10 (33.33%) were 45 minute, and 6 (20%) were 40 minute. The Two-Way ANOVA found a significant result in DTN time ($p = 0.024$), the infarction type ($p = 0.023$), and the interaction of both factors ($p = 0.029$) related to the NIHSS improvement. The post hoc study found the difference of NIHSS improvement occurred between the group 40 minute versus 55 minute ($p = 0.023$) and 60 minute ($p = 0.001$).

Conclusion

The faster DTN time will give the better NIHSS improvement, and if the case is a territorial infarct, then it will give a greater NIHSS improvement than in a lacunar type infarct.
