Abstract

This paper aims to analyze the dynamic interactions of the Islamic and conventional stock markets and the factors contributing to the interaction. Asymmetric dynamic conditional correlation (ADCC) model, as a recent technique, was applied to identify the interaction and it then acts as a consequence factor in panel data and GARCH(p,q) models regressions. The data were taken from four countries, which consist of developed and emerging markets and have Islamic stocks indices with sample period from January 2000 to December 2016. The results suggest that the stronger dynamic interaction level for all

[Home](#) / [About the Journal](#)**Aims and scope**

Journal of Advanced Research in Law and Economics is designed to provide an outlet for theoretical and empirical research on the interface between Economics and Law. The Journal explores the various understandings that economic approaches shed on legal institutions.

Journal of Advanced Research in Law and Economics publishes theoretical and empirical peer-reviewed research in law and economics-related subjects. To explore the various understandings that economic approaches shed on legal institutions, the Review applies to legal issues the insights developed in economic disciplines such as microeconomics and game theory, finance, econometrics, and decision theory, as well as in related disciplines such as political economy and public choice, behavioral economics and social psychology. Moreover, *Journal of Advanced Research in Law and Economics* publishes research on a broad range of topics including the economic analysis of regulation and the behavior of regulated firms, the political economy of legislation and legislative processes, law and finance, corporate finance and governance, and industrial organization.

Its approach is broad-ranging with respect both to methodology and to subject matter. It embraces interrelationships between economics and procedural or substantive law (including international and European Community law) and also legal institutions, jurisprudence, and legal and politico – legal theory.

The quarterly Journal reaches an international community of scholars in Law and Economics.

Journal of Advanced Research in Law and Economics is currently indexed in [EconLit](#), [ProQuest](#), [CEEOL](#), [EBSCO](#), [HeinOnline](#), [CABELL'S Directories](#) and [REPEC](#) databases.

Invitation for Qualifies Reviewers for Editorial Board & International Program Committee Members

ASERS Publishing invites the interested professionals to contribute into ASERS Publishing's research network by joining us as a part of Editorial Board & International Program Committee members for its scientific peer-reviewed journals & books.

Interested applicants must submit a detailed CV along with a List of Publications at apg@aserspublishing.eu.

Please remember that your help with reviewing the papers would be very much appreciated.

Publication ethics and Publication malpractice statement**Publication malpractice statement**

Journal of Advanced Research in Law and Economics is committed to pursuing the highest standards of probity and the elimination of malpractice in research presented within this journal. Journal's ethics and malpractice statement is based on COPE's Best Practice Guidelines for Journal Editors.

All ASERS Publishing's Journals adopt the COPE guidelines on publication ethics <http://publicationethics.org/resources/code-conduct>.

Reviewing process follows these steps:

- 1st Step: The Editor in Chief will make an initial screening of the paper submitted in order to determine if it is suitable with the scope and the aims of the journal.
- 2nd Step: The submission received will be checked with the anti-plagiarism software before will undergo a double blind peer reviewing process. If the report indicates suspicious, the paper will be rejected, else will follows next stage.
- 3rd Step: The paper is double-blind peer reviewed by the members of Editorial Advisory Board, according with the area of research indicated by the JEL Classification specified by the author in its paper.
- 4th Step: The final decision is made by the Editor in Chief based on the recommendations and comments of reviewers. The Editor in Chief decides whether the paper should be accepted as it is, revised (with minor or major corrections) or rejected. Any changes which affecting the substance of the text will, of course, only be made in agreement with the author.

The review process usually takes between 3 and 4 weeks but sometimes, due to number of papers, complexity of research submitted could be up to 6 weeks.

Duties of Authors:

- Submitted manuscripts must be the original work of the author(s)
- Only unpublished manuscripts should be submitted.
- It is unethical to submit a manuscript to more than one journal concurrently.
- Any conflict of interest must be clearly stated.
- Acknowledge the sources of data used in the development of the manuscript.
- All errors discovered in the manuscript after submission must be swiftly communicated to the Editor.

Abstract

The global economic crisis, many internal problems of the national economy, threats and negative impact of the external environment are the main causes of economic instability at the national level, and as a result, instability at the regional level. In this regard, the basic condition of regional development is a public policy that will ensure sustainable socio-economic development of regions on the basis of their potential and possible threats from the external environment. In modern society feel the need to research aimed at solving problem the development of society from a position of respect social priorities, balancing the interests of the government, civil society, the business community, conservation of ecological balance. Today require state regulators that will allow to organize the process of strategic management of development of regions taking into account the interaction of many internal and external factors affecting their development. The development of theoretical and practical issues concerning the choice of strategy of development of regions and mechanisms to achieve policy objectives, approaches to the assessment of the degree of achievement of goals and objectives is a critical task in the development of regional self-government. The increasing need of renovation and improvement of organizational support of strategic management of socio-economic development of the regions in compliance with the main guidelines of economic reforms in the Russian economy through the development of strategic partnership of government, community, business community, and the need to improve the methodical support of assessment of effectiveness of strategic management of region's development and the degree of stability of its development was determined by the relevance of the chosen topic.

Effect of Corporate Governance Rules on Voluntary Disclosure in Jordanian Corporations (An Empirical Study)

Munther AL-NIMER

Accounting Department, Faculty of Economics and Administrative Sciences, Hashemite University Jordan, [Jordan](#)

DOI: [https://doi.org/10.14505/jarle.v9%202\(32\).01](https://doi.org/10.14505/jarle.v9%202(32).01)

Abstract

This paper aims to examine the impact of corporate governance (CG) rules using several variables—size of the board of directors, size of the audit committee, family ownership ratio, and their impact on the level of the voluntary disclosure of companies listed with Amman Stock Exchange (ASE). The study was conducted based on the annual reports of the first market that include 55 firms. Content analysis was applied to collect the required data from several sectors (financial, insurance, services, and industrial sectors) from 2016 to 2017. The results indicate a negative association among family ownership ratio, size of the audit committee, and voluntary disclosure level. However, the study shows that the size of the board of directors has a significant positive relationship with the level of voluntary disclosure. Furthermore, the results show that CG rules (size of the board of directors, size of the audit committee, and family ownership ratio) have a significant positive relationship with the voluntary disclosure level of the companies listed with ASE. In the borderline market environment, the study contributes to a theoretical understanding of the corporate governance of voluntary disclosure and the relationship between corporate governance mechanisms and voluntary disclosure. The outcomes provide empirical support for the theoretical notion that effective corporate governance plays an important role in increasing the extent of voluntary disclosure.
