Dear Mr. Fajrin Pramana Putra

We have reached a decision regarding your submission to Jurnal Ilmiah Pertanian, "Maize Root Growth on N, P, and K Fertilization Using Rhizotron."

Our decision is to Revisionsrequired.

Dr. Indra Purnama
Editor-in-chief
indra.purnama@unilak.ac.id

Reviewer A:

Introduction :

add some references about the standard of N, P, and K fertilization on maize-based on other research

Research Methode :

1. add a reference as a basis for determining how to apply the fertilizer
2. Add the description of maize variety
3. Add the relationship between root dry weight and crop dry weight to the method

Result and Discussion :

Check at the file

Recommendation: Revisions Required

Reviewer C:

REVIEW

This is an interesting study, and the authors have collected interesting ground data. However, in my opinion, the paper has some shortcomings regarding some grammar and analyses. I have provided numerous remarks and corrections. I also suggested enriching the introduction and methodology regarding the novelty and its importance compared to the other study.

Introduction

1. In the introduction, please explain more about N, P, and K fertilizer, including abbreviations and the maize's advantage. Because the manuscript, it was lack information about it.
2. The word "aimed" is not common to explain research objectives; please add the introduction's research objectives because it was not clear.
3. Please explain why you use the rhizotron; what are the advantages and disadvantages of these tools? How about the dimension of the rhizotron that used in this research?

Methodology

1. In the first paragraph of the research method, could you write the location where the research conduct?
2. Please explain why you choose each brand of fertilizer, is it has other ingredients in each brand?
3. Please give the information when the measurement of root and crop was done (days after planting)?

Results and Discussion

1. The authors provide a piece of good information on methods. However, the discussion sessions are minimal. The manuscript should provide a detailed discussion. For example, the interpretation and relationship between the root weight and crop dry weight. Is it true the fertilizer is the only factor for the relationship?

Conclusion

1. Please add more about the obstacles in this research and the recommendation for future research.

Addition note:

Please check the grammar for the writing.

Recommendation: Revisions Required

Dear Mr. Fajrin Pramana Putra:

Congratulations! We have reached a decision regarding your submission to Jurnal Ilmiah Pertanian, "Maize Root Growth on N, P, and K Fertilization Using Rhizotron."

We decide to: Accept Submission

Please submit your final revision to our website before **January 18, 2021**.

Dr. Indra Purnama
Editor
indra.purnama@unilak.ac.id

Reviewer A:
Recommendation: Accept Submission

Reviewer B:

Thank you for revising your manuscript and resubmitting it to the journal.

I find the manuscript greatly improved, and I thank you for this.

I have a few concerns that remain to be addressed, however.

First, I think it is better to mention Nitrogen (N), Phosphorus (P), and Potassium (K) in the first paragraph of the introduction.

Second, please use the same format for the references and citation, some references use the capital alphabet, and some are not.

That's all, thank you very much.

Recommendation: Accept Submission

Dear Mr. Indra Purnama

Thank you for your email, I have sent a discussion on the JIP system, and request a slight improvement regarding the period [.] at the end of the sentence in the method section and in Table 3, please remove the space between the table and notes.

Thank you for your attention.

Regards,
Fajrin Pramana Putra
