*Currently, the small-medium enterprises become more familiar and gained benefits from electronic commerce. On the other side, electronic commerce also used by some people as a platform to sell psychotropic drugs. This study is normative legal research with a legal approach (statue approach) and a case approach. This research is legal normative with a legal approach (statute approach) and a case approach. This study explains the fact that the trade of psychotropic drugs is not in line with the law and discusses the legality of selling psychotropic drugs online. The results of the study show that the laws and regulations regarding psychotropics still do not meet the legal requirements that arise as a result of the development of online transactions, especially those related to online sales of psychotropics. It is necessary to reform the law by continuing to amend and pass the Bill on Drug and Food Control which the process was halted in 2019, in the context of legally controlling the illegal use of online marketplaces (marketplaces) to sell psychotropic drugs*
