**ABSTRACT**

**BACKGROUND** Obesity is strongly correlated with insulin resistance (IR) and nonalcoholic fatty liver disease (NAFLD). Some studies suggest that dietary intake with low glycemic index (GI) may prevent IR and reduce the incidences of NAFLD. This study was aimed to determine the effects of low GI diet on IR among obese adolescents with NAFLD.

**METHODS** This study was a randomized controlled trial conducted in two Junior High Schools in Semarang, Indonesia. The subjects were 12-14 years obese students with NAFLD, which divided into intervention and control groups according to schools using block random allocation. The intervention group received nutrition education and lunch diet (low energy, low GI, and low fat); meanwhile, the control group only received nutrition education for 12 weeks. The biochemical evaluation included fasting blood glucose (FBG) and insulin levels. IR was assessed using homeostatic model assessment-insulin resistance (HOMA-IR).

Terima kasih telah mengirimkan naskah ke Medical Journal of Indonesia dengan judul "LOW GLYCEMIC INDEX DIET INTERVENTION IN ADOLESCENT WITH NON-ALCOHOLIC FATTY LIVER DISEASE (NAFLD) : A RANDOMIZED CONTROLLED TRIAL".

Sebelum naskah dapat di proses lebih lanjut, mohon untuk melengkapi hal - hal di bawah ini :

1. Mohon mengisi Rekomendasi reviewer. yaitumerekendasikan 2 orang/pakar yang Sejawat anggap memenuhi syarat sebagai reviewer (afiliasi, alamat email, dan no. telp), pakar harus diluar dari afiliasi Sejawat dan tidak memiliki konflik kepentingan dengan salah satu penulis (form terlampir).
2. Mohon mengisi Form final checklist, harus ditandatangani oleh seluruh penulis (terlampir)
3. Mengisi Form conflict of interest (terlampir)
4. Mohon memperbaiki naskah dari file terlampir
5. Mohon melampirkan ethical clearance

Naskah akan dilanjutkan apabila seluruh kelengkapan telah terpenuhi. Demikian kami sampaikan. Mohon untuk melengkapi dalam waktu 2 minggu terhitung sejak hari ini, yaitu sebelum tanggal 11/01/2018. Atas perhatian dan kerjasama dokter, kami ucapkan terima kasih.

Hormat kami,  
Maylia Putri

Dear Dr. Maria Mexitalia,

I have the response from the reviewer for your manuscript. According to the reviewer, the title should relate to the aim of your study. The suggestion was to use: The effect of a low glycemic index diet on HOMA-IR in obese adolescent with non- alcoholic fatty liver disease (NAFLD): .....(please complete with your original title).

The analysis should use a difference between groups instead of within groups to see the evidence of cause-effect relationships. Thus, need to be re-analyzed and re-write.

If possible, reference within 5 years up to present is preferable.

I believe that you can adjust your manuscript, especially about possible re-analyzing the data. And we will proceed if you can get back to us within 2 - 3 weeks.

Thank you for your cooperation.

Kami telah mengirimkan email dengan subjek "Peer review result", pada tanggal 30 Juli 2018, tetapi hingga sekarang kami belum menerima respon dari penulis. Mohon segera mengirimkan revisi artikel sesuai email tersebut dalam waktu 2 minggu.

Selain itu, mohon untuk melengkapi dokumen berikut ini:

1. Rekomendasi reviewer, yaitu 2 orang/pakar yang Sejawat anggap memenuhi syarat sebagai reviewer (afiliasi, alamat email, dan no. telp), pakar harus diluar dari afiliasi Sejawat dan tidak memiliki konflik kepentingan dengan salah satu penulis (form terlampir).
2. Form final checklist, harus ditandatangani oleh seluruh penulis (terlampir)
3. Form conflict of interest dari masing-masing penulis (terlampir)
4. Ethical clearance
5. Kelengkapan dalam manuskrip, terlampir.

Naskah akan dilanjutkan apabila seluruh kelengkapan telah terpenuhi. Demikian kami sampaikan. Mohon untuk melengkapi dalam waktu 2 minggu.

Atas perhatian dan kerjasama dokter, kami ucapkan terima kasih.

Hormat kami,

Windu

Dear Dr. Maria Mexitalia,

First of all, thank you for submitting the revision. At this point, I have sent it to the reviewers to get more insights. While waiting for that, I have my own comments and question. I have put them in the manuscript attached here. I did also some editing. You can also change them if necessary.

I hope to gather all input both from reviewer and you all within a reasonable time.

Best regards,

Dear Dr. Maria Mexitalia,

There is another result from second-tier reviewing, with the response here:

1. Sample size calculation, statistical analyses and time of the study were not yet mentioned.
2. Ethical approval letter number and date of approval was not mentioned.
3. Random allocation by school of two schools, not individually subjects was randomly allocated. Meaning no blinding, and more suitable as quasi experimental design?
4. In table 1 energy and fat intake was a difference in the baseline, was it be controlled during the analyses?
5. Table 2 and table 3 should be merged. There should be an explanation whether the analysis done for difference mean between-group or within the group?
6. Is there any intention/explanation for including figure of daily intake?

<https://mail.google.com/mail/u/0/?ik=03be71da20&view=pt&search=all&permthid=thread-f:1607345626448008354&simpl=msg-f:1607345626448...> 3/4

Bcc: Maria Mexitalia <dr.mexitalia@gmail.com>

Dear Dr. Nia Kurniati

Thank you for sending us the comment from reviewers.  
Herewith I send the manuscript revision after considering the response from reviewers.

There is another result from second-tier reviewing, with the response here:

1. Sample size calculation, statistical analyses and time of the study were not yet mentioned.
  - We have already added those at the manuscript.
2. Ethical approval letter number and date of approval was not mentioned.
  - We have already added those at the manuscript.
3. Random allocation by school of two schools, not individually subjects was randomly allocated. Meaning no blinding, and more suitable as quasi experimental design?
  - in our opinion, our study was RCT without blinding. The random allocation was applied at school level to reduce the bias of the study.
4. In table 1 energy and fat intake was a difference in the baseline, was it be controlled during the analyses?
  - Yes, we did the pre and post intervention analysis and added the explanation at the manuscript.
5. Table 2 and table 3 should be merged. There should be an explanation whether the analysis done for difference mean between-group or within the group?
  - We merged the table 2 and 3 and did the analysis for difference mean between group.
6. Is there any intention/explanation for including figure of daily intake?
  - We added some explanation on the figure.

We hope that the manuscript is fulfill the criteria for publication at Medical Journal of Indonesia.  
However, please let me know if there are some requirement needed to add.

Thank you very much for your kind cooperation and attention.

Regards

Dear Editor-in chief Medical Journal of Indonesia

Thank you for your valuable comments and revisions. We apologize for late response.

Herewith we make some revisions according your suggestions as follows :

1. We changed a part of title "HOMA-IR" with "Insuline resistance"
2. We added the assessment of insulin resistance using "HOMA-IR" in the abstract
3. Method : We added time for education ( 12 weeks )
4. Introduction :
  - Thank you for revising the paragraph.
  - However, we have already written "HOMA-IR" in detailed method section "HOMA-IR" an assessment of insulin but the calculation
5. Result :
  - We delete previous table 1.
  - We added the energy intake different between groups on the table 1 (there's only one table at our manuscripts).
  - We add diagram consort (figure 1)
  - We make revision the figure 2 with more detailed explanation about the yo-yo phenomen. We hope that our diagram fulfill the standard of the journal.
6. We make revision on the discussion as your suggestion.
7. We make revision of the references and add new reference.

Thank you very much for your kind attention and help.

Sincerely yours,

Maria Mexitalia

Dear Dr. Maria Mexitalia:

We have reached a decision regarding your submission to Medical Journal of Indonesia, "LOW GLYCEMIC INDEX DIET INTERVENTION IN ADOLESCENT WITH NON-ALCOHOLIC FATTY LIVER DISEASE (NAFLD) : A RANDOMIZED CONTROLLED TRIAL".

Our decision is to accept your manuscript. However, your manuscript can be processed further if the authors complete the following data on your manuscript. i.e.:

1. Complete the metadata of all authors. At least consisting of name, email address, and affiliation.
2. The conflict of interest form enclosed, should be filled by all authors.
3. The enclosed final checklist form, should be assigned by all authors.
4. Send all of the figures in .jpg format with minimum 300 dpi resolution
5. Ethical Clearance should be included.

Please do complete within 3 weeks (Jun 13, 2019) so that your manuscript can be processed further. Thank you for your collaboration.
