Manuscript ID: # 13032

Manuscript Title: Dilemma of presymptomatic testing in children with history of late onset neurodegenerative spinocerebellar ataxia in Indonesia
Journal of Biomedicine and Translational Research (JBTR)

Dear Author(s),

Thank you for submitting the above manuscript to the JBTR for consideration of publication.

We are pleased to inform you that the blinded peer review process is completed. The reviewer comments are appended below for the authors' revision.

Please revise the manuscript and submit 2 copies (one clean copy and one annotated blinded copy) of the revised submission to the editorial office by 27 January 2022.

In the annotated blinded copy, indicate all changes made by yellow-highlighting the amended portions and also by identify the location (page, paragraph and line numbers) in the manuscript. The numbers should correspond to the numbering of your reply to the reviewer comments. Please include a blinded cover letter providing a point-by-point reply to the reviewer comments, and number each point accordingly.

To submit your revision, go to <https://ejournal2.undip.ac.id/index.php/jbtr> and log in as an Author. Under the menu item 'Active Submissions', you will be able to find your submission record.

Thank you for your support to the JBTR.

Yours sincerely,

Editor

Journal of Biomedicine and Translational Research (JBTR)

Reviewers' comments:

Reviewer 1

1. General Comment:

This paper discussed about two cases of spinocerebellar ataxia (SCA). The paper is generally well written

2. Abstract:

Abstract is well written. Please add the information of legally adult age in the part of case presentation

3. Introduction: Good

Is this a first case report of SCA presymptomatic testing in Indonesian children? Please add this information

4. Results:

1. Case 1: Please add the age information of patient's brother and father when they got affected by diseases

2. Case 2: Please add the age information of III.11 and III.14

5. Discussion:

Is there any ethical impact for doing the genetic testing in children for late onset disease, either in Indonesia or abroad? Please provide this information

6. Conclusion: It is well written

Reviewer 2

1. General Comment:

The topic of this manuscript is good, but I do not find the novelty of this case reports? If the authors want to depict the problem of genetic counseling in Indonesia, I think some disorders also have the simillar problems

2. Abstract: Good structured, but I do not find the methods for this study.

3. Introduction: Well structured

4. Methodology:

Maybe it is better if the authors can describe how they find the cases, and is there any ethical clearance for this case? How about the informed consent?

5. Results: Well presented

6. Discussion:

Actually there is other issue for the genetic counseling in Indonesia, such as the coverage of cost from the insurance, maybe the authors can add regarding this issue

7. Conclusion: No comment

Dear All,

Berikut saya sampaikan revisi dan jawaban atas review paper di Journal of Biomedicine and Translational Research. Terlampir blinded cover letter, annotated blinded copy yang telah ditandai, dan clean copy.

Mohon kiranya masukan dari Prof Sultana, Prof Iin, Bu Annas, dan dr. Bella, sekiranya ada yang perlu ditambahkan atau diperbaiki sebelum saya submit kembali. Terima kasih atas perhatian yang berkenan diberikan,

Sincerely,
Nydia

Dear Author(s),

We would like to inform you that your article entitled "Dilemma of presymptomatic testing in children with history of late onset neurodegenerative spinocerebellar ataxia in Indonesia" has been accepted for publication in Journal of Biomedicine and Translational Research Vol.8, No. 1 (2022): April 2022. Your last revision has answered the corrections from reviewers. Your manuscript will be edited for the layout before it is published. Please note that shortly you will receive notification email with a link to your published paper.

To complete the submission, please submit Copyright Transfer Agreement by 20 March 2022. The form can be downloaded under the menu item 'Submission'.

If you have any questions, please do not hesitate to contact us. We are looking forward to your upcoming manuscript. Thank you for your best cooperation.

Best Regards,
