Yours sincerely,  
Manging Editor,

[Journal of Management Information and Decision Sciences](#)

Reviewers comments:

## **#REV 1**

### **To Author:**

Introduction : Subject matter is contemporary and relevant ...BUT...presented too briefly...Introduction section backdrop missing relevant data related to topic.... logical flow missing although reason cited for choosing this topic!!....

Pls add Some Data Literature Review: Separate section missing... Yes...10 academic source cited ... Literature Gap should have been highlighted as separate section..... in depth research NOT done...

Research Method: This is literature but literature is missing....only sources have been described

This paper need serious re draft

## **#REV 1**

### **To Author:**

(1) The Abstract needs a re-write. It fails to convey the substance and importance of the body of the manuscript.

(2) The Authors need to make the case for why data is importance to organizations. They never do. It's just accepted fact. Also, the connection between data and governance needs to be made as well.

(3) The Authors need to make a better case for studying Indonesia. What is there unique and importance in terms of data governance in Indonesia to the rest of the world or for that fact the Third World.

(4) The Syntax is wrong in places, for example, the Purpose statement should be at the end of the Introduction or at least there should be a Purpose Statement there. This is the place where the Authors

need to make the case for Value Added in terms of their study. Just that Indonesian data governance is "fantastic" is not enough. What did their study do that has not yet been done or if it has been done how did their study do it better. What will a reader walk away with that will be of value that they can use elsewhere.

(5) The manuscript needs a PRISMA diagram to show the representativeness and comprehensiveness (breadth and depth) of their literature search.

(6) I would recommend the use of a professional Editing service that specializes in technical and scientific writing more for style and content. The English in the manuscript is excellent and it does not need copy-editing and proofing, but the content and syntax need work.

list of Submitted Articles:

Contents: This page lists all submissions that have been assigned to an Editor, for which the Editor's decision has not yet been made. This includes submissions with invited Reviewers, submissions out for review, submissions requiring a decision, and submissions which have a subordinate Editor's decision but not a decision from the top Editor in the decision-making chain.
