[IJG] Editor Decision: Resubmit
1 pesan

Winarsih Winarsih <wiwin_geo@ugm.ac.id>   2 April 2024 pukul 15.04
Kepada: Bambang Darmo Yuwono <bdyuwono92@gmail.com>

Dear Mr. Bambang Darmo Yuwono,

I hope this email finds you well. We appreciate your contribution to our
publication, and we would like to inform you that our editorial team has
conducted an initial review of your article titled: "Assessment Potential
Mechanism Flood Risk induced by Land Subsidence using Machine Learning".
Based on initial review there are certain revisions and additions needed to
align it with our editorial standards. Attached to this email, you will find
the results of the initial review, specific areas that require attention.

Please take the time to carefully go through the feedback provided in the
attached document. Addressing the mentioned points will not only enhance the
overall quality of your article but also expedite the review process.

Once you have made the necessary revisions and completed the requested
additions, kindly resubmit the revised manuscript at your earliest
convenience and please highlith on your editing. Upon receipt of your
revised article, we will promptly forward it to the designated reviewer for
further evaluation. Revision
procedures(https://simpan.ugm.ac.id/s/m6daSpDt3mhXroU)

If you have any questions or require clarification on the feedback provided,
please feel free to reach out to us. We are here to assist you in ensuring
that your article meets our publication standards.

Once again, thank you for submitting your manuscript to the Indonesian
Journal of Geography and I look forward to receiving your revision no later
than 14 days from now. If you failed to meet the deadline, we may have to
consider your paper rejected.

NB: Please use the follow the guideline in the attached in the sistem for
your revision.

Best wishes,
Assistant Editor

Subject: [IJG] Editor Decision: Revision Required

Dear Bambang Darmo Yuwono,

Dear Author(s),

Your manuscript has been commented on by an editor and one or more reviewers. After examining the reviewer's and editor's remarks (see below), we have decided that your article should be major-revised for submission to the Indonesian Journal of Geography., " Assessment Potential Mechanism Flood Risk Induced by Land Subsidence using Machine Learning)".

You should improve the quality of your manuscript by editing it in response to the reviewers' and editors' remarks. When submitting the modification, please carefully react to the reviewer's and editor's remarks, and clearly indicate the changes you made (with color or highlight them) to answer the reviewer's comments. Alternatively, you can respond directly to the reviewer's comments in the area provided by the reviewer. We will not process any updated work without an explicit response to reviewer and editor feedback.

When uploading a corrected manuscript, the author must also create or attach a file titled "respond to editor or/and reviewer comments," which describes the adjustments that have been made and shows where the revisions appear in the article. We request that the manuscript be rewritten with highlighted text (RED colors).

We then attach a pdf file (with an example) containing (1) an examples of a revised article and (2) an also example on how to "respond to editor/reviewer comments". In addition, if any, please examine the file containing reviewers' comments from the IJG system.

Thank you for submitting your work to the Indonesian Journal of Geography. I look forward to receiving your revision within 60 days. If you miss the deadline, we may have to consider your paper rejected.
The next edition of IJG will be published in August, if we receive the revision before July 20, then we hope that this manuscript will be included in the August edition.

SECTION EDITOR's comments:
I have read the work, expressed severe issues, offered feedback, and recommended significant improvements. Kindly go over each and every one of the remarks with a RED font in the amended manuscript to highlight the necessary adjustments. Avoid using track changes. A file with a table documenting the reviewer and my comments, your response to each criticism and action taken, and the position (i.e., page #, line #) of the changes in the updated text are also requested. THIS IS A VERY IMPORTANT STEP IN THE DECISION PROCESS. CONSEQUENTLY, YOU MUST BE VERY CLEAR.

Major comments:
(1) The abstract should include background information, research purpose, methodology, findings, novelty statements, and comparisons to similar cases.
(2) Provide a thorough discussion of the results and compare them to relevant studies.
(3) Ensure the paper's discussion and conclusions are tailored to an international readership, while remaining general in nature. (THERE MUST BE A DISCUSSION WITH THE SAME CASE COMPARISON IN SOME LOCATIONS AROUND THE WORLD)
(4) In the end of the introduction section, emphasize the paper's novelty and appeal to a global audience, rather than just the local audience. What can an international reader of the journal learn from the paper? What is the research question that the paper aims to answer? What do the authors contribute? What is new about the methods? A relevant statement should be included in the introduction. The paper's emphasis should be on the new methods and science produced rather than on the local application.".
(5) Enhance the literature review in the Introduction to identify research gaps that led to the current study.
(6) Provide up-to-date international references to support the reference list discussion.
(7) There are several comments by the reviewers (if any please download them in the IJG system) that need to be carefully answered, and appropriate corrections/additions should be made. Also, comments in uploaded files should be addressed.

Furthermore:

1. English requires editing for grammatical errors and proofreading by a native speaker to meet publication standards. Consider using a proofreading service like http://www.goodlingua.com/.
2. Ensure that all references in the list are cited in the text, and vice versa.

Response to Reviewers

Assessment Potential Mechanism Flood Risk induced by Land Subsidence using Machine Learning

B. D. Yuwono , L.M. Sabri., A.P Wijaya, and M. Awaluddin

No	Reviewers Comments	Response	Page
1.	The abstract should include background information, research purpose, methodology, findings, novelty statements, and comparisons to similar cases	Abstract have been added with background information	Page 1 , line 11-12
2.	Provide a thorough discussion of the results and compare them to relevant studies.	Discussion has been added	Page 16 Line 12-22
3.	Ensure the paper's *discussion and conclusions are tailored* to an international readership, while remaining general in nature. (THERE MUST BE A DISCUSSION WITH THE SAME CASE COMPARISON IN SOME LOCATIONS AROUND THE WORLD)	Discussion has been added	Page 16 Line 12-22
4.	In the end of the introduction section, emphasize the paper's novelty and appeal to a global audience, rather than just the local audience. What can an international reader of the journal learn from the paper? What is the research question that the paper aims to answer? What do the authors contribute? What is new about the methods? A relevant statement should be included in the introduction. The paper's emphasis should be on the new methods and science produced rather than on the local application."	Novelty added in the end of paragraph	Page 3 , line 23
5.	Enhance the literature review in the Introduction to identify research gaps that led to the current study.	Citation review has been explored to find the gap.	Page 2 line 9-32
6.	Provide up-to-date international references to support the reference list discussion.	Citations paper has been added	Page 9 line 18-36
7.	There are several comments by the reviewers (if any please download them in the IJG system) that need to be carefully answered, and appropriate corrections/additions should be made. Also, comments in uploaded files should be addressed.	Citation review has been explored to find the gap.	

	Furthermore :		
1.	English requires editing for grammatical errors and proofreading by a native speaker to meet publication standards	English has been corrected using native proofreding	
2.	Ensure that all references in the list are cited in the text, and vice versa.	All Reference has ben Checked	
3.	Check the list of references for missing or incorrect information, such as journal abbreviation, volume number, issue, and page number. Format the listed references using the journal's style. Also, please be consistent in writing the references style	All Reference has ben Checked	Page 17 Line 31
4.	Ensure all tables and figures are cited in the text and in numerical order.	All Table has ben Checked	
5.	Ensure the abstract does not exceed 250 words.	Abstract contains 250 words.	
6.	Some figures may not pass journal quality control due to small character sizes. Please increase the resolution of the figure. Please upgrade all figures (with *.jpg extension) to a minimum resolution of 300 dpi.	Figures has been revised to meet requirement	
7.	For this international journal, please include a complete map of Indonesia, including coordinates, orientation, and legend. The quality of the maps and figures is very poor, please improve.	Figure 1 Studi Area has been revised	Page 4 Line 14
8.	The abstract should include background information, research purpose, methodology, findings, and comparisons to other cases.	Abstract have been corrected with new insight.	Page 1 Line 9-23
9.	This manuscript lacks sufficient discussion, particularly in comparison to similar research in other countries, for publication in a Q-3 tier journal.	Disscussion has been added.	
10	please strictly adhere to the authors' formatting guidelines for text, tables, section titles, and list references.Examine the appearance of published papers in this journal and make any necessary adjustments	Table, sectons, and References have been checked	
11.	Carefully check the revised paper before re-submission	The Revised paper have been corrected and revised.	
12.	There are attachments (if any) with comments by the reviewers in the IJG system. These comments should also be addressed	The reviewers comments has been addressed in . Conclusion and Discussion	Page 16 line 8 - 29

[IJG] Editor Decision: Accept Manuscript

14 pesan

Tjahyo Nugroho Adji <adji_tjahyo@ugm.ac.id>   25 Juli 2024 pukul 05.47
Kepada: Bambang Darmo Yuwono <bdyuwono92@gmail.com>

Dear Bambang Darmo Yuwono,

Congratulations! After considering your responses to reviewer's comments, We
have reached the decision regarding your submission to Indonesian Journal of
Geography, "Assessment Potential Mechanism Flood Risk induced by Land
Subsidence using Machine Learning" to Accept your manuscript to be published
in Indonesian Journal of Geography.

You will receive emails regarding the details of your publication. We may
also request a technical edit of your manuscript if necessary. The article
will likely come in the next edition.

The Indonesian Journal of Geography requires manuscripts to be written in
good and correct English, so if you or one of your co-authors are not
English native speakers, please provide us proof that your manuscript has
gone through the proofread stage, as evidenced by a certificate from the
proofreading company/services.
If your manuscript has not gone through the proofread stage and or does not
have a certificate, you can use the proofreading services that have
collaborated with us and claim a 5% discount via the following link
https://goodlingua.com/

Once you have a certificate from the English proofreading company, please
submit it right away to ijg.ugm@gmail.com as soon as possible.

For the purposes contribution of this article payments, we ask for data to
make issue a billing via the following link
https://docs.google.com/forms/d/e/1FAIpQLScdPnAy9DQmENfWbFcTo-_SdNpZk-mqrtXq7F1z8dUq4GVTyw/viewform?vc=0&c=0&w=1&flr=0

Thank you for submitting to the Indonesian Journal of Geography and we look
forward to receiving your manuscript in the future.

Best wishes,
Dr. Tjahyo Nugroho Adji
