Dear authors,

We would like to declare that Bali Medical Journal is still in Scopus coverage

There is some signs that shows a journal is not on the list anymore, such as:

1. On the Scopus website, it says discontinued

2. On the Scopus script list, it says inactive

We suggest you check it on Scopus Source Title List

Please download directly from there and see the status of the journal in "**Status**". If it's **active**, it means it's still covered

Best regards

Bali Medical Journal Editor

Dear Editors

Bali Medical Journal,

We would like to ask due to the Scopus coverage years
wether This journal is still coverage in Scopus ?

Due to at Scopus website,

It is mentioned that Scopus Coverage years: from 2020 to 2022.

I do hope Bali Medical Journal will still maintain its coverage in Scopus this years and the next years to come.

Best of luck for all Journal Editors and members.

Thank you for your cooperation.

Best regards,
