Submission Title: Correlation between Total Ischemic Time with Creatinin Level and Urine Production in Kidney Transplant : A Single Centre Report

Dear Dr. Eriawan Agung Nugroho,

Thank you for your submission to "The Open Urology & Nephrology Journal". It will be sent to the Editor in Chief for his initial provisional approval, and once this is obtained for peer-reviewing, on the understanding that the manuscript contains original work that has neither been published earlier nor has simultaneously been submitted elsewhere. In case this is not so, please let us know immediately.

Please note that Bentham Open uses CrossCheck's iThenticate software to check for similarities between the submitted and already published material to minimize any chances of plagiarism.

Further, as per Bentham Open's Ethical Guidelines for Publication, all manuscript are processed with the understanding that all authors and co-authors have reviewed and accordingly approved the manuscript before final submission to avoid any conflicts of interest later. Our ethical policies can be viewed at: .

The recommended number of references as per norm (<https://clarivate.com/essays/impact-factor/>) for Review Articles is approximately 100 or more, for Research Articles 75 or more, for Mini Reviews 75 or more & for Letter Articles 50 or more. Articles which are well referenced (100 or more references) may have high chances of acceptance by referees and they are likely to attract a greater number of citations.

In case of any doubt or conflict please contact us immediately.

Your manuscript has been assigned to the following Editor/Manager, to whom all correspondence is to be addressed:

Name: Tushar Vachharajani
Affiliation: Hefner Veterans Medical Center, Hefner Veterans Medical Center

Country: USA
Email: tushar@benthamopen.com

Few tips to enhance the visibility & citations of your article:

- Selection of Appropriate Keywords: Choose important and relevant keywords that researchers in your field will be searching for so that your paper will appear in a database search. In biomedical fields, MeSH terms are a good 'common vocabulary' source to draw keywords from <https://www.nlm.nih.gov/mesh/meshhome.html>
 - The names of the authors should be provided according to the previous citations or as the authors would want them to be published along with the institutional affiliations, current address, telephone, cell & fax
-

- The names of the authors should be provided according to the previous citations or as the authors would want them to be published along with the institutional affiliations, current address, telephone, cell & fax numbers and the email address. Email address must be provided with an asterisk in front of the name of the principal author. The corresponding author(s) should be designated and their complete address, business telephone and fax numbers and e-mail address must be stated to receive correspondence and galley proofs. It is also suggested to regularly update your profile on SCOPUS and other databases.
- Authors should avoid the use of non-standard abbreviations and Question marks in titles.

Please note that your article will not be processed till you have completed and return the attached fee form.

Looking forward to the successful publication of your article.

In case of delay, please feel free to write info@benthamopen.net

Thanks and regards,

Sumaiya Azhar (Ms.)
Manager (Publications)
Bentham Science Publishers

Manuscript Title: Correlation between Total Ischemic Time with Creatinin Level and Urine Production in Kidney Transplant : A Single Centre Report

Dear Dr. Eriawan Agung Nugroho,

Thank you so much for submitting your manuscript for consideration for publication in **The Open Urology & Nephrology Journal**. The manuscript has been reviewed by the experts in the field and they feel that substantial additional work would be needed to make the manuscript sufficiently signified to our readership. Under this situation, we are unable to accept the manuscript for publication in its present form.

We are looking forward to receive your pre-revised manuscript soon for reconsideration.

Please login on our portal <https://bentham.manuscriptpoint.com> to submit revised manuscript.

Editorial Comments:

Indeed Sport Engineering is an important field, however it is on the border of scope of Biomedical Engineering. My opinion is to ask authors to modify manuscript to make it more biomedical by adding biomedical aspects.

Sincerely,

Editorial Office
Bentham Science Publishers

Submission Title: Correlation between Total Ischemic Time with Creatinin Level and Urine Production in Kidney Transplant : A Single Centre Report

Dear Dr. Eriawan Agung Nugroho,

Thanks for submitting the manuscript to "The Open Urology & Nephrology Journal". Your manuscript has been reviewed by experts in the field, and the consensus is that it needs significant revision keeping in consideration the comments given below. You are encouraged to address the comments of the reviewers and carefully revise the manuscript, highlighting the exact changes made in the manuscript. **Publication policy requires the return of your revised manuscript latest within two weeks of the safe receipt of this message.**

Furthermore, please note that Bentham ONLY accepts articles written in good English for publication.

Authors who are not native English speakers, should please ensure to have their article corrected by a native English speaker or by a professional language editor for any grammatical, semantical/stylistic and typographical errors.

Authors who are native English speakers should ensure that their article has been revised for language, grammar, and style (where appropriate). This is in your interest as it will substantially reduce the time taken for publication of your article.

Sincerely,

Shahnila Azhar (Ms.)
Manager (Publications)

Note: For complaints contact: complaint@benthamsience.net

Comments A:

Small single centre retrospective study in Kidney transplant recipients evaluating a correlation with total ischemia time with reduction in serum creatinine and urine output post transplant. It would have been good to provide baseline characteristics of the study population. English language and presentation can be improved.

Comments B:

There are many typographical errors in the manuscript which need to be corrected.

Dear Ms Shanila,
Thank you for your reponse.
Comments A :
I have made modification the manuscript and I attached baseline characteristics sample of the reearch. About the English language, I made some revised to make better.

Comments B :
I have made correction for the typo in this manuscript.

Thank you very much

Best regards,
Eriawan

Submission Title: Correlation of warm and cold ischemic time to graft function in kidney transplant: A Single Centre Report

Dear Dr. Eriawan Agung Nugroho,

I am pleased to inform you that your article entitled "Correlation of warm and cold ischemic time to graft function in kidney transplant: A Single Centre Report

" has been accepted
for publication in "The Open Urology & Nephrology Journal" after independent peer review.

We recommend you to publish your Animated Abstract, along with the article abstract, to extend the coverage of your article. Bentham Open has collaborated with Focus Medica, one of the world's largest publishers of expert animated atlases and videos in medicine and science, to create an Animated Abstract of your article. Animated Abstracts will be published as open access (free-to-view) and help summarize the essential discoveries/key findings of your research, highlight the importance of the article for further research and utilization in the relevant industry. Each professionally produced, full-colored animated abstract, in video format (length 3 – 5 minutes) is accompanied by an English or foreign language commentary. You can avail this service against a fee to get the Animated Abstract published with your textual / graphical abstract on the Journal's homepage. It will serve to define and gain attention for the article.

You will be pleased to know that Bentham Open has collaborated with Kudos to increase the portfolio of its services for Bentham authors. Kudos is among the preferred media for researchers. It is a web-based service that helps researchers maximize the visibility, usage of and citations to published articles (www.growkudos.com.) Kudos will be contacting you to register to use this service.

We have reached a decision regarding your submission to "The Open Urology & Nephrology Journal". The manuscript has been reviewed by the editorial board members of the journal and independent experts in the field. Based on the reviewers comments, I am delighted to inform you that the manuscript is now accepted for publication in the journal. On behalf of the Editorial Board, I would like to thank for your contribution and hope that you will consider this journal for future manuscripts.

We shall be most grateful if you could kindly agree to distribute the journal flyer at the next few conferences that you attend. Please download the flyer from the journal website.

We wish to thank you for submission of the manuscript to "The Open Urology & Nephrology Journal" and look forward to a continued collaboration in the future.

Again, I sincerely thank you for submission of the manuscript in The Open Urology & Nephrology Journal.

Our decision is to: Accept Submission

With warm regards,

Sumaiya Azhar (Ms.)
Manager (Publications)
Bentham Science Publishers
